

# MANO EDU lite

The compact screen reading system with three cameras

MANO EDU lite closes the gap between a handheld magnifier and a desktop video magnifier. The high-resolution 12.5-inch screen is large enough to capture a lot of details in magnified form, yet small and light enough to be conveniently stowed away in a backpack like a tablet.

The device can be operated like a cell phone or tablet via the touchscreen. Even without using the touchscreen, MANO

EDU lite is easy to operate thanks to the clearly arranged buttons.

The detachable distance camera can also be used to view far away details, such as pictures on the wall. This camera can be adjusted downwards and thus serves as a second document camera, e.g. for writing. Images, PDFs and texts can be viewed on the device via an SD card. As a special highlight, MANO EDU lite reads out text files\*

## Your benefits at a glance

- FullHD 12.5" (approx. 31.8 cm) touch display
- approx. 2.2-50x magnification
- two integrated cameras and one detachable camera in 4K resolution
- distance camera can be rotated and swiveled, can be bent 90 degrees and used as a second document camera, e.g. for writing
- read aloud function for PDF/TXT files\*
- freeze image function and image memory
- SD card support
- line ruler/mask, overview magnifier, voice guidance for buttons and menus

\*only in conjunction with information saved as text. MANO EDU lite does not have an OCR function, e.g. to read out texts from image files or scans.
