

USB Switch Interface 8

BJ-806

Connect up to eight switches to your computer

Connect up to eight switches to a computer USB port and use them with several different applications that offer switch access.

The computer recognizes the device as a **joystick** and with the software provided it is possible to convert the inputs into **mouse or keyboard signals**.

- 8 switch inputs for 3.5 mm jack plug (female).
- Plug & play USB device.
- Size: 105 x 65 x 19 mm.
- Operating systems supported: Windows, Linux, Android, Chrome OS, Mac OS.
- HID Joystick device.

Compatible with switch.

Compatible with Android versions higher than 3.1 and depending on the device.
