

Four for the little ones

MEET THE VIVA JUNIOR FAMILY

Four models: from rear-wheel drive to the standing function

PRECISELY CUSTOMISED DESIGN ON THE ONE HAND...

A day-to-day companion needs to fit you well. That's why our power wheelchairs feature a modular design and come with a whole range of customisation options. Standard adjustments? With us, this is just the beginning. We go further with a variety of design options to suit your needs: from various lift types and chassis versions to countless cushion options. All to make sure that your Viva Junior is a perfect fit for you and your lifestyle.

...AND PROFESSIONAL ADVICE ON THE OTHER

Customised design and professional, competent advice are two sides of the same coin for us. It all starts with a conversation. Where do you need to go? What are your plans? What challenges do you face? We listen, ask questions and then put our specialist knowledge, experience and technical creativity to use. The end result? A solid, long-term relationship where everyone can have fun together. And your very own Viva Junior. Built just for you.

We've been building power wheelchairs since 1965. Since then, we've created models ***with their own unique strengths.*** This includes ***the tried-and-tested, innovative Viva Junior range*** for children, teenagers and people of smaller stature.

WHAT ALL VIVAS HAVE IN COMMON

We design our power wheelchairs with one clear goal: to support you in everyday life. Five features in particular are important to us, and all Viva models have them. And yet, each of our power wheelchairs has its own unique strengths to provide you with optimal support. Let's talk – We'll find just the right Viva that suits you best.

GROWS WITH YOU – SEAMLESSLY ADJUSTABLE

MOBILE EVERYWHERE – INDOORS AND OUTDOORS

COMPACT DIMENSIONS – FITS THROUGH ANY SPACE

MODULAR DESIGN – BECAUSE EVERYONE IS DIFFERENT

EXCELLENT HANDLING – AGILE AND FAST

COMFORTABLE – ERGONOMIC BY DESIGN

The Viva Junior is rugged, compact and manoeuvrable. This makes it ideal for young people who want to explore their surroundings independently. Not least thanks to a host of special control options, such as the wireless stop function. Thanks to its many adjustment functions, it can be optimally adapted, growing along with its user.

WITH REAR-WHEEL DRIVE

Viva Junior

Detailed information

FEATURING THE STANDING FUNCTION

Viva Junior S

Detailed information

Experience the world standing up with the Swiss Viva Junior S, our multi-position power standing wheelchair for children and teenagers. Its sophisticated technology enables nearly perfect therapeutic standing with all its benefits: from easier breathing and better circulation to easier muscle building.

For more information, visit www.sks-rehab.com/ Swiss Viva Junior S

Detailed information

New: Also available with the anterior lift function!

FEATURING A MID-MOUNTED MOTOR

Viva Junior M

Turn, manoeuvre and stay flexible – the compact Viva Junior M is with you through daily life and every adventure. Thanks to mid-wheel drive and a rugged design, you'll always be in the thick of things, moving through tight spaces or getting up to speed outside. We adapt it to perfectly suit your life with a targeted, customised design – from riding through the park to the perfect turn in the classroom.

Detailed information

New: Also available with the anterior lift function!

FEATURING FRONT-WHEEL DRIVE

Viva Junior F

Whether you're at the park, on a forest path or lakeside, the Junior F gives you the freedom to discover more of the world. Its powerful front-wheel drive conquers inclines and rough terrain. Thanks to its compact design, there's plenty within reach indoors, too. The Junior F continually adapts to your life thanks to a precisely customised design, electrically adjustable backrests and for the simple fact that it grows along with you.
