

## Control 6 Plus

### BJ-246-6

Control everything around you with a single remote. Control 6 Plus lets you configure up to 11 functions and manage the key elements of your environment—from lights and blinds to your bed or hoist—easily, quickly, and fully customized to your needs.

If you need to manage more elements of your environment in a direct and simple way, Control 6 Plus is your ally.

With up to 11 functions, it brings together everything you use daily in a single remote: doors, blinds, lift, hoist, bed, lights, and any infrared device such as TV or air conditioning.

We've added larger, more comfortable buttons, repeated-press detection, sequences to automate routines, and an improved programming interface both on the remote and in the Control Configurator app.

## Configure the remote from the App

Connect, customize, and save your favorite setup—**no codes, no complications**. The free Control Configurator app (available for Android 9 or later) allows you **to configure the remote from your phone** using a **USB-C** cable, with a clear and accessible interface.

### What you can do with the app:

- **Import your** current remote's **configuration**, edit it and send it back to the device.
- **Create configurations from scratch** for [Control 2 Plus](#), [4 Plus](#) or 6 Plus.
- **Assign actions** to each button (radiofrequency, infrared, GewaLink, KNX, scene switch...).
- **Save your configurations** in the app library for later use or duplicate them on another remote.
- **Adjust parameters** such as debounce time or action sequences.

In just a few minutes, your remote will be ready to control doors, blinds, lights or any infrared-based device.

## Download the app on Google Play:

## Design sequences and automate your routines

Control 6 Plus takes automation a step further. Thanks to its extended capacity, you can **create advanced sequences** that chain multiple actions together with a single tap. For example, by pressing “go to bed,” the remote can **lower the blinds, turn off the lights, raise the bed rail and turn on a night light.**

You can also create routines for specific moments of the day—such as waking up, relaxing or working—adjusting the devices you need according to your environment. These sequences are very easy to set up using the Control Configurator app, which guides you step by step to customize every detail.

- Number of slots: **6**
- Functions per slot: **2**
- Total functions: **up to 11** (one slot is used to switch the functions of the others)
- Raised keys • Ergonomic design • Hanging clip
- **3.7 V - 400 mAh** Li-ion polymer battery
- **USB-C 2.0** for charging/data – minimum 1 A charger
- RF: **433 MHz (ICM)**

- IR: **38 kHz, 56 kHz**
- GewaLink **database** • Siemens IR-KNX **database**
- Dimensions: **82 × 50 × 16.5 mm**
