

URSUS ACTIVE™
active wheelchair

URSUS ACTIVE™ is a special wheelchair designed for daily rehabilitation of children with locomotor dysfunctions. Furthermore, this wheelchair may be very useful concerning orthopaedic disorders and lower limbs relief needed after surgery.

The wheelchair is equipped with anti-tippers wheels that prevent the patients to tip over backwards. Optionally, Ursus **Active™** can also be equipped with push handles for a caregiver.

Tilt-in-space function allows you to smoothly adjust the tilt angle of the seat which helps you to relieve hips by moving the weight of body from pelvis area to the back.

Thanks to the **ClickClack®** system we can quickly detach the seat and attach it to other products that are in our offer (**Ursus™**, **Ursus Home™**, **Ursus Active™**, **Quark™**).

IT IS RECOMMENDED IN THE FOLLOWING CASES:

- Cerebral palsy – various types and forms.
- Brain and spinal cord injuries with lower limbs paralysis and weakness, balance and motor coordination disorders with different etiology.
- Demyelinating disease (e.g. multiple sclerosis – SM).
- Meningocele.
- Muscles diseases with weakness and paralysis (dystrophy, myasthenia gravis, myositis).
- Genetic disorders.
- Degeneration and neurological diseases.
- Other condition connected with muscles weakness, paralysis and musculoskeletal disorders.
- After head and spinal cord injuries and spine trauma with paralysis
