ultraCORE
repose[®] Lite Inside

Healthcare professionals involved in the prevention and treatment of pressure ulcers are often faced with time constraints, limited resources and increasing budget pressures all of which can impact on patient outcomes.

Repose[®] is a range of reactive air, pressure redistribution and reduction support surfaces, all with high levels of immersion and envelopment.

A combination of unique materials and Smart Valve Technology, has been clinically proven to deliver statistically significant patient benefits.¹

A unique combination of materials and smart valve technology

Repose is a range of reactive air, pressure redistribution and reduction support surfaces

The Repose reactive air, single cell design, offers high levels of immersion and envelopment, ensuring optimum pressure redistribution for the prevention and treatment of pressure ulcers.

Repose thermoplastic polyurethane (TPU) offers six-times multi-directional stretch, optimum immersion and envelopment, providing patients exceptional levels of comfort and pressure redistribution properties.

Optimum levels of inflation, every time

Repose Smart Valve Technology is easy to use, reliable and ensures optimum levels of inflation to 0.2psi, every time.

0.2psi is the optimum target value for pressure redistribution and clinical efficacy through immersion and envelopment.

Repose can be deployed very quickly when a patient is at risk of developing a pressure ulcer.

Repose is a comfortable, durable and multi-patient use solution

Repose is easy to clean in line with local policy and reusable for multi-patient use.

If cared for correctly, Repose will provide pressure ulcer prevention for several years⁵.

Repose is breathable and has no sharp edges, increasing comfort, compliance and reducing the risk of tissue damage.

Three year warranty as standard

Repose is manufactured in the UK and comes supplied with a three-year warranty as standard⁷.

Multi-patient use and a three-year warranty provides a cost-effective solution for the prevention and treatment of pressure ulcers.

Repose has a maximum user weight limit of 222Kg⁶

Clinically proven to deliver statistically significant patient benefits

- ✓ VERY HIGH RISK
- ✓ HIGH RISK
- ✓ AT RISK

Repose protects patients at all levels of risk

Repose is indicated for the prevention of pressure ulcers for patients from at risk to very high-risk when used as part of package of care.

Repose protects patients at all levels of risk

- ✓ VERY HIGH RISK
- ✓ HIGH RISK
- ✓ AT RISK

Repose has demonstrated low levels of pressure ulcer incidence across multiple studies (5.2%¹, 4.8%², 5.1%³, 5.2%⁴)

Repose is indicated for the treatment of all categories of pressure ulcers

Repose is indicated for the treatment of all categories of pressure ulcer when used as part of package of care. Repose has been clinically proven to deliver statistically significant patient benefits.

Repose is indicated for the treatment of all categories of pressure ulcers¹⁻⁵

Unlike, other reactive air products and dynamic systems, through Randomized Control Trials, Repose reduces peak and average pressures, consistently delivers low levels of pressure ulcer incidence, in a cost effective and easy to use system.¹⁻⁵

Supporting international guidelines and recommendations

Our range of pressure area solutions supports the latest EPUAP international guidelines for pressure ulcer prevention and treatment.

The guideline consists of five main sections, with important recommendations and good practice, that apply directly to the Frontier portfolio of pressure area care solutions.

To learn more please see our EPUAP Quick Reference Guide by scanning the QR code above.

Supporting you and your patients every step of the way

Frontier Medical has a dedicated sales and clinical support team to ensure clinicians and patients are supported every step of the care pathway.

Learning Frontier offers organisations access to a tailored training solution covering product training, equipment selection and generic pressure area care education as part of a pressure ulcer prevention strategy, delivered by our dedicated clinical support team.

Library of Evidence

Building a winning case for your patients, supporting evidence-based practice and improving patient outcomes.

Repose is a range of reactive air, pressure redistribution and reduction support surfaces

Repose[®] Foot Protector

Repose Foot Protector Heel Off-loading

- Completely off-loads heels for either pressure ulcer prevention or as part of the management of heel ulcers in patients with elevated legs
- Can be used on top of dynamic alternating mattresses as a complementary therapy

Available in multiple sizes

Available with a PU Strap

Repose[®] Wedge

Designed to completely off-load heels

- Completely off-loads heels for either pressure ulcer prevention or as part of the management of heel ulcers
- Multi-adjustable fixing straps are designed to hold Repose Wedge securely in position

Suitable for patients:

- Who are confused and may not be able to remove other off-loading devices when moving off the bed
- Who are restless
- Who have wider calves
- Suffering from foot drop
- On their sides or tilted
- Those who find a boot type product warm

Repose[®] Sole Protector

Designed to protect the soles of the feet

- Provides pressure redistribution at the bed end, helping to eliminate the risk of pressure ulcers
- Suitable for use with community and acute beds
- Easy to clean polyurethane straps

Suitable for patients:

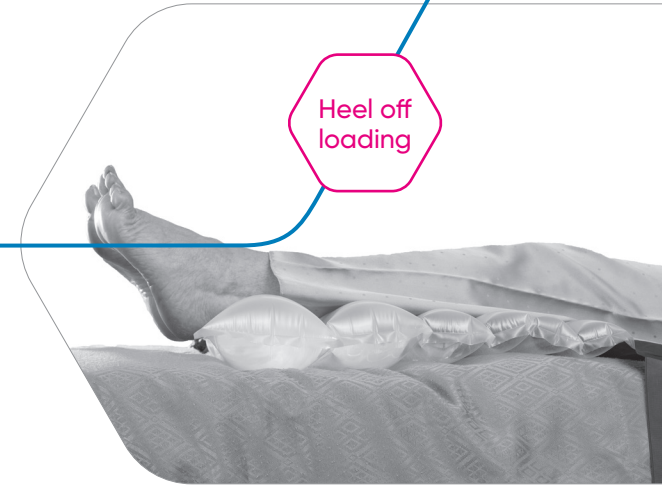

- Who could slide to the bottom of the bed

Repose[®] Foot Protector Plus

Repose Foot Protector Plus has the additional benefits of:

- Supporting more mobile patients by including a Magnaffix adjustable strap to retain the device in place when in bed or sat out
- The open heel void of Repose Foot Protector Plus increases ventilation of the foot and so contributes to patient comfort. The open heel void also allows for easier visual inspection of the heel for wound observation and monitoring.

Available in multiple sizes

Repose[®] Flex

Designed to reduce the risk of DVT¹⁰

- Flex is designed to place the knee in slight flexion (5° to 10°) and allow complete heel offloading while effectively re-distributing the weight of the patient's leg across its surface⁸
- By placing the knee in slight flexion, the risk of Popliteal Vein Compression at the rear of the knee is reduced¹⁰.
- Popliteal Vein Compression is a significant source of Deep Vein Thrombosis for patients undergoing surgery or prolonged bed rest⁹.

Available in multiple sizes

1. Assess patient for risk of falls before using Repose Foot Protector Plus and if mobile, their ability to remember and physically remove the device before walking. Not for use by mobile but confused patients.
2. Only for use when the leg is elevated. Do not use when patient's feet are directly on the floor to prevent the risk of falling.
3. Providing there is a foot board in use and the patient is deemed to be at risk of pressing feet against it. Only suitable for use for up to Category 4 pressure damage.

Foot Care Product Size	Leg Measurement
Extra Small	460mm - 410mm
Small	500mm - 450mm
Standard	550mm - 490mm
Long	690mm - 550mm
Maximum calf circumference 330mm	

Measure from the base of the heel to the mid-point of the back of the knee, whilst the patient is sitting.

Repose® Cushion

Comfortable pressure redistribution

- Portable solution for static chairs fitted with arm rests and riser recliner chairs.
- Slim profile increases patient comfort
- Higher outer air cells provides greater stability
- Repose Cushion Cover available

Suitable for patients:

- Assessed as being up to very high risk and / or with up to Category 4 pressure damage to the sacral area

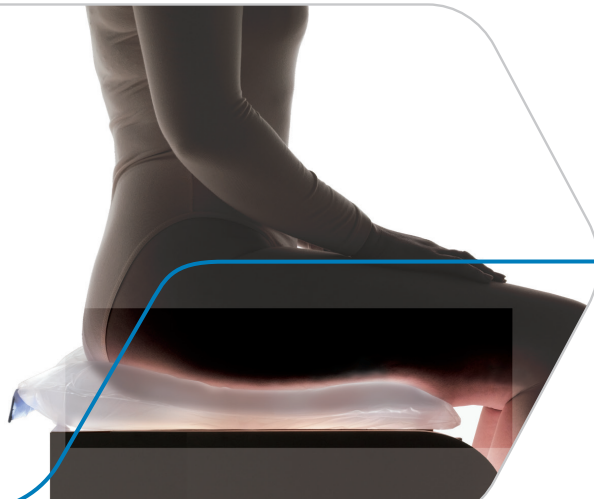

Repose® Care-Sit

Pressure area care for static chairs and wheelchairs

- The two-section cushion construction provides independent back and seat support which combined with wider outer air cells increases patient comfort
- Two cushion widths (40cm and 45cm) and adjustable straps allows Repose Care-Sit to be used across a wide range of chairs

Suitable for patients:

- Assessed as being up to very high risk and / or with up to Category 4 pressure damage to the back and sacral areas

Repose® Contur

Pressure area care for riser recliner chairs

- Provides head to toe protection against pressure damage to the sacrum, buttocks, scapulae, vertebrae and occiput
- Secures easily and safely with straps and so can be fitted onto a range of chair sizes

Suitable for patients:

- Assessed as being up to very high risk and / or with up to Category 4 pressure damage to the sacrum, buttocks, scapulae, vertebrae, shoulders or occiput

Accessories

Repose Strap Extender

- For use when the strap attached to the Repose Cushion is not long enough to secure to the chair.

Repose Cushion PU Cover

- Blue polyurethane covers are moisture vapour permeable and water resistant, providing extra added protection to Repose products.

Repose Cushion Refresh Cover

- Refresh cover protects from damage, stains and discolouration

One year manufacturing warranty for all accessories

Repose Seating Solutions
Weight Limit 139kg

Pathway for use of Repose Seating

Repose Care-Sit, Seat Cushion and Contur

Solutions

Patient weighs less than 139kg and assessed as being in the seating area and / or vertebrae or with up

up to VERY HIGH RISK of developing a pressure ulcer to CATEGORY 4 pressure damage in these areas

Patient mainly sits in a static chair or transit wheelchair

Buttocks, sacral area and/or vertebrae at risk

Buttocks and/or sacral area only at risk

Repose Care-Sit

Patient elevates limbs whilst sat out and has up to a Category 4 pressure ulcer on heel(s)

Repose Cushion

Repose Foot Protector or Foot Protector Plus³

*Please refer to Foot Care Solutions brochure for Foot Protector and Foot Protector Plus

Higher than usual risk of damage from hot and/or sharp objects e.g. pets

Cushion required to fit larger than average chair

Repose Cushion and Cover²
Plus optional replacement Refresh Cover⁴

Repose Cushion Strap Extender¹

Patient mainly sits or sleeps in a riser recliner chair for long periods

Pressure ulcer prevention required head to toe and patient is at risk of all categories of pressure ulcer on either the sacrum, buttocks, scapulae, vertebrae or occiput

Pressure ulcer prevention required head to toe and patient is at risk of all categories of pressure ulcer on heel(s)

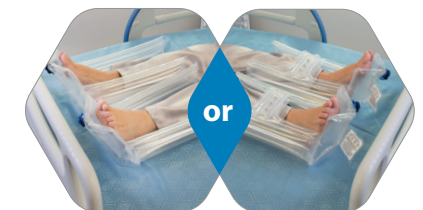

Repose Contur

Repose Contur

with either Repose Foot Protector or Foot Protector Plus³

1. For use when the strap attached to the cushion is not long enough to secure the cushion to the chair
2. The use of other manufacturers covers is not recommended. Additional layers between the cushion and product will reduce the effectiveness and should be used with caution

3. Only use Repose Foot Protector and Repose Foot Protector Plus when legs are elevated. For further information regarding these products, please refer to the Repose Foot Care Solutions brochure.
4. Repose refresh cover replacement for Repose Cushion outer cover should product experience staining or damage during use.

Repose Mattress Overlay

A pressure redistribution overlay for single and double beds

- Works by immersion and envelopment to maximise the contact surface area and reacts instantly to patient movement
- Silent and discreet aiding compliance and patient dignity
- Portable solution for single and double beds
- Suitable for use in both acute and community settings.
- For the prevention and treatment of pressure ulcers when used as part of a package of care
- Slim profile increases patient comfort
- Securing retention straps to fit a range of acute and community beds

Repose Mattress Overlay
Weight Limit 222kg*

Repose Double
Mattress Overlay

Repose Single
Mattress Overlay

Repose Trolley Companion

Combining effective pressure redistribution with safer lateral patient transfers in a slim form factor

- Consists of Repose Trolley Mattress Overlay providing a comfortable and effective pressure redistribution surface throughout the hospital journey
- Slide sheet base material provide product durability
- Multi stretch cover which has welded seams and zips, with a integral cover flap to prevent fluid ingress
- Retaining fixing straps secures the product firmly in place aiding stability and security
- Machine washable polyurethane cover

Repose Trolley Companion
L 2000mm x W 615mm

Repose Trolley Companion
Weight Limit 139kg

Repose Companion

Combining effective pressure redistribution with safer lateral patient transfers

- Patient is always protected by an effective pressure redistributing surface throughout their hospital journey
- Helps to reduce the risk of shear and facilitates safer lateral transfers with an integrated slide sheet
- Suitable for use on both a patient trolley and standard single bed-frame
- Multi stretch cover which has welded seams and zips, with a integral cover flap to prevent fluid ingress
- Machine washable polyurethane cover

Repose Companion
L 1970mm x W 880mm

Repose Companion
Weight Limit 139kg

Ultracore Repose Lite Inside

An evolution in reactive air hybrid mattress technology

- Ultracore is an immersive, reactive air foam hybrid mattress designed for the prevention and treatment of pressure ulcers as part of a pressure ulcer prevention strategy.
- The Ultracore combines **three** components to offer exceptional pressure redistribution properties.

1. Repose Mattress Inner

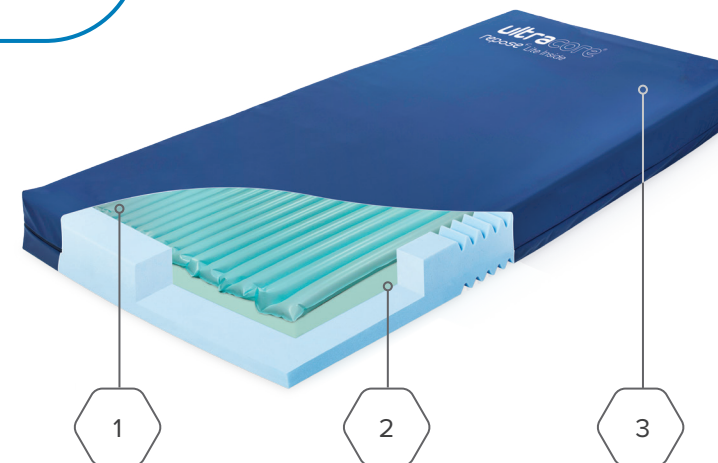

A reactive air, pre-inflated pressure redistribution and reduction support surface, with high levels of immersion and envelopment.

2. Foam U-core

Designed to follow the contours of a profiling bed, the u-core structure provides extra stability and support to the mattress

3. Multi-stretch Cover

A multi-stretch polyurethane cover, that is moisture vapour permeable, water resistant and has a protective ingress zip cover

Foam Density / Hardness
Support Surface 33/160 • Side Walls 39/200

Ultracore Repose Lite Inside

Repose Foot Care Solutions Range

Repose Seating

Solutions Range

Repose Paediatric Mattress Overlay

A pressure redistribution overlay for a single paediatric beds

- The Repose Paediatric Mattress Overlay was developed specifically at the request of the Great Ormond Street Hospital for Children in London and is now widely used in other children's units.
- The product is sized to fit the majority of paediatric bed frames and mattresses. Suitable for use in both acute and community settings.

Repose Paediatric Mattress Overlay
L 1290mm x W 670mm

Suitable for Children
1 year to under 13 years

Repose Paediatric Mattress Overlay
Weight Limit 139kg

Repose Babynest

A pressure redistribution overlay for neonatal intensive care unit

- The Repose Babynest consists of a base mattress with an additional air-filled border along the foot end of the product.
- These borders act as developmental boundaries that help with nesting the infant with or without additional padding.
- Suitable for use with incubators.

Repose Babynest
L 580mm x W 330mm x H 100mm

Suitable for Neonates
Under 4 weeks

Repose Babynest Overlay
Weight Limit 3kg

Repose Babytherm

A pressure redistribution overlay for cots and warmers

- The Repose Babytherm overlay is a pressure relieving mattress for neonatal units and is suitable for use with the majority of standard incubators, cots, and warmers

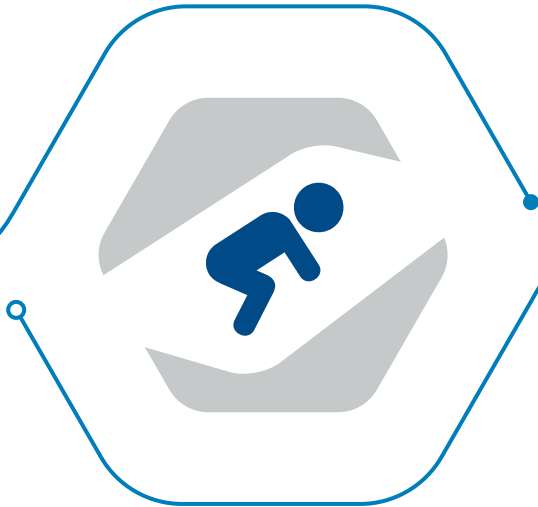

Repose Babytherm
L 760mm x W 530mm

Suitable for Infants
4 weeks to 1 year

Repose Babytherm Overlay
Weight Limit 139kg

 6. **Maximum User Weight Limit**
Repose Mattress Overlay, Repose Double Mattress Overlay, Repose Companion, Repose Trolley Companion and Repose Trolley Mattress Overlay when used on a high specification foam mattress - 222kg.

Repose Mattress Overlay, Repose Double Mattress Overlay, Repose Companion, Repose Trolley Companion and Repose Trolley Mattress Overlay when used on a non-high specification foam mattress - 139kg.

Repose Cushion, Repose Care-Sit, Repose Contur, Repose Paediatric Mattress Overlay, Repose Babytherm Overlay - 139kg

Repose Babyrest Overlay - 3kg (There is no lower limit)

Repose Wedge, Repose Foot Protector, Repose Foot Protector Plus, Repose Flex and Repose Sole Protector - No weight limit

Ultracore Repose Lite Inside - 250kg
 7. **Manufacturers Guarantee**
Frontier Therapeutics Limited. warrants Repose for 36 months, against manufacturers defects. The warranty does not include general wear and tear, or failure by other means.

Repose accessories including Repose Blue PU Covers has a warranty of one-year.
