

TRANSFER PLATE

Practical and efficient, small but robust, the SURFDIS is ideal for helping wheelchair users get in and out of the car (driver or passenger side). SURFDIS is optimally designed so that the wheelchair can be brought very close to the vehicle saving strain on arms and shoulders, and gives the legs room to swing round easily without being blocked by the car door.

The SURFDIS transfer plate is equipped with a quick-locking/release system and folds away neatly alongside the seat back where it is safely locked in position during driving.

SURFDIS

CATEGORY

Transfer aid

THE PLUSES

- > Practical
- > Robust
- > Smart design

SAFETY

- > Locked in stowed position while driving.

INSTALLATION

- > Can be fitted on either the driver or passenger side of any vehicle.
