AUTO-LEKTOR CLICK!

It really clicks with you

The Auto-Lektor Click is a simple yet powerful portable text to speech reading assistant. It is a stand-alone and compact device with all the controls built into it. You can plug it into the power outlet or take with you and run it on the battery.

An external color-coded Braille keypad expands the functionality of the reader. The Auto-Lektor Click means:

- quick access to printed information
- unimpaired interaction with recognized text
- ease of use
- portability
- independence
- excitement
