**JENX**<sup>®</sup>  
Positioning for life

# Bee by Jenx

Styled specifically to appeal to very young children and their families, and developed in conjunction with therapists and carers, the Bee by Jenx is an ideal playful and gentle introduction to supported seating. It provides an outstanding level of versatility through a comprehensive range of fixed and height adjustable bases, along with a wide variety of head, trunk, leg and foot support options. This means each Bee can be precisely tailored to the exact needs of each individual child. Adjustable back angle and tilt-in-space options, alongside the ability to accommodate babies as small as 4 months right through to children of around 5 years, mean the Bee really does tick every box for maximum functionality, flexibility and style!

## INNOVATIVE FEATURE

### Back Angle Adjustment

From 15° recline through to 10° forward, this feature can be used to create the required hip angle for the optimum seating position for each child.

## INNOVATIVE FEATURE

### Long Leg Sitting Board

Simply and firmly attached and removed with just two screws, the **Long Leg Sitting Board** can be used permanently or intermittently, both for very young children or those needing an extra stretch to the thighs or calves.

## INNOVATIVE FEATURE

### Adjustable Seat Depth

To ensure the fit is exactly right for each child the seat depth is fully adjustable from 110-360mm.

### Nursery Tray

**INNOVATIVE  
FEATURE**

A useful surface for work, feeding or play, made from antimicrobial plastic to provide a hygienic and easy to clean surface.

### Angle-Adjustable Footplate

**INNOVATIVE  
FEATURE**

To accommodate or encourage dorsi or plantar flexion, adjustable quickly and simply with the turn of a dial.

# Always Supportive

Every position a child adopts has an effect on their development and functional movement now and in the future.

Minimises fatigue and assists activity and functionality

Helps digestion

Encourages bone & muscle development

Assists neutral alignment

Proper support makes it easier for children to join in every day activities

Sitting well helps you breathe more easily

Support of pelvis, thighs & feet forms the foundation of stability

Provides opportunities to increase social skills

A stable base supports, develops and can provide greater independence and interaction with friends and family, resulting in more smiles for everyone!

## INNOVATIVE FEATURE

### Flip-away PU Support Pads

Included as standard for hip support and available in 2 sizes for optional trunk support. They have an easy, single-handed flip-away action and are made from PU. These supports are fully flexible, easy to clean and impervious to fluids making them simple, hygienic and robust.

## INNOVATIVE FEATURE

### Adjustable Back Height

From 265-365mm, as the child grows, Bee grows with them!

## INNOVATIVE FEATURE

### Height Adjustment

5 different base options with a variety of fixed or adjustable heights allow the flexibility for each child to enjoy activities from floor level, to breakfast bar height.

# Always Configurable Accessories

The Bee by Jenx has a wide range of accessories and optional extras meaning it can be highly customised for every child's needs.

## Bee Seat Unit

Suitable for children from as young as 4 months to around 5 years, the Bee seat unit provides all the basics for a solid seating foundation, including:

- Padded seat and back
- Adjustable, flip-away PU hip pads
- Adjustable footpost
- Angle-adjustable footplate
- Lapstrap with groin safety strap
- Push handle
- Flat Headrest – this can also be used as an infill back pad for taller children.

## Multigrip™ Headrests

The original and innovative Jenx **Multigrip™ Headrest** is available in 3 sizes for all Jenx seating systems. All Jenx Multigrip™ head supports have a choice of various highly flexible fixing brackets, all of which give adjustment for height, depth and angle.

## Flat Headrest/Upper Back Pad

Included as standard with every Bee seating unit and also available as an additional accessory, this is a simple headrest for children who require only very minimal head support. Can be used to extend the back pad height and in addition to any other compatible Jenx headrest.

## Multigrip™ Shoulder Protractor

A unique and innovative Jenx design, **Multigrip™ Shoulder Protractor** is available exclusively on the Bee. Cushioned fingers provide flexible support and it simply slots into place beneath the headrest, encouraging children to bring arms into midline.

## Lumbar Pad

Simply attach into place by hook and loop fastener to give additional lumbar support.

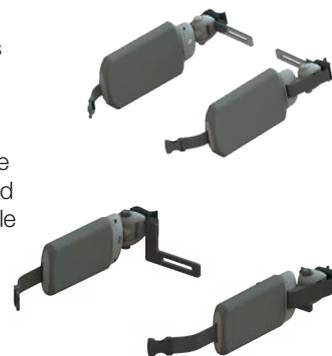

## Thoracic Support Pads

Available in a range of short, long and slimline sizes (all without straps) with regular, or high/low rise brackets, these trunk support pads are made from flexible and hygienic PU. There is a single-handed push button flip-away action on all supports and they are independently adjustable for height and width. Can be offset to brace a scoliosis or accommodate other skeletal deformities.

## Flexible Thoracic Support Pads

Available in a range of sizes, these slimline and super flexible support pads (with straps) are designed to provide outstanding positioning with comfort in mind. All sizes feature single handed flip-away action and are independently adjustable for height and width to ensure maximum trunk control.

**Also available: High-rise Flexible Thoracic Support Pads,** offering a greater range of height adjustment.

## Additional Back Pad

A deeper 50mm backpad to reduce the seat depth for really small children. Simply attach the hook and loop fastener into place behind the standard 25mm back pad - easily removed when no longer needed.

## Long Leg Sitting Board

Easily attached and removed with just two screws, the **Long Leg Sitting Board** can be used permanently or intermittently for very young children or those needing an extra stretch to the thighs or calves. Adjustable support blocks attach firmly by hook and loop fastener. All other settings remain unchanged making the change from regular to long-leg sitting quick and easy.

## Foam Blocks

A pair of **Foam Blocks** which can be used to fill gaps or provide additional support or cushioning wherever it is needed. Covered in wipe clean PU fabric.

## Waistcoat Harness

Provides additional trunk support to children with low tone. The zip fastens at the top of the waistcoat and zips downwards to allow for feeding buttons.

## Armrests

Provided as a pair, the armrests are independently adjustable for height and angle. Clear markings make it easy to set the armrests at the correct height.

NB: Required for using a tray.

## Nursery Tray

A useful surface for work, feeding or play, made from antibacterial plastic providing a hygienic and easy to clean surface. Contrasting tray edging gives a definitive boundary particularly useful for children with visual impairments and is also raised to allow toys or other items to be securely fastened in place. It's also available with reduced cut-out for babies and small children.

NB: Suction toys, anchors or grab bars will not work with this tray – to use these items with the Bee please see the **Nursery Laminate Tray**.

## Nursery Laminate Tray

A useful surface for work, feeding or play, made from composite laminate providing a hygienic and easy to clean surface. Contrasting tray edging gives a definitive boundary, particularly useful for children with visual impairments and is also raised to allow toys or other items to be securely fastened in place. Perfect surface for use with suction toys, anchors or grab bars.

## Tray Edge Padding

Extra cushioning for the tray edge adjacent to the child. Attaches simply with hook and loop fasteners and is covered in wipe-clean PU fabric.

## Tray Elbow Blocks

Used to encourage arms into a midline position and/or to block excessive retraction.

## Activity Frame

Great for encouraging head control and hand/eye co-ordination. Easy to attach and adjust. Comes with two clips for attaching toys or other items.

## Grab Bar

Perfect for children who need to fix one hand to increase functionality.

## Abduction Blocks

Available in 2 sizes providing different levels of abducted seating.

## Knee Block

Easy to use **Knee Block** with fully adjustable knee cups which can be used to control legs and create abduction or adduction or control windsweeping.

## X-Base Black

A compact, robust and cost effective base with high-low and tilt-in-space functionality. With lockable, swivel castors and a height range of 365-535mm. Tilt-in-space 30° supine – 10° prone.

## X-Base White

The white based version of the X-Base offers a higher height range of 415-615mm, meaning it can now allow children to engage with family members and friends at dining table height with ease. Tilt-in-space 30° - 10° prone.

## Y-Base

The most flexible base in the Jenx range, the **Y-Base** offers a height range of 325 - 765mm alongside tilt-in-space functionality and lockable, swivel castors. Tilt-in-space 30° supine – 10° prone.

## Wooden High Base

Exceptional value, the **Wooden High Base** offers fixed height seating (500mm) which is compact, economical and stylish. It features lockable swivel castors and tilt-in-space 20° supine.

## Wooden Low Base

Exceptional value, the Jenx Wooden Low Base offers fixed height seating (360mm) which is compact, economical and stylish. It features lockable swivel castors and tilt-in-space 20° supine.

## Footplate Pad

Attach to the footplate to give a softer surface for children who don't require more structured foot positioning.

## Sandals

Available in 4 different sizes to accommodate any size of foot, even when wearing splints, **Sandals** are interchangeable across the entire range of Jenx seating and standing products.

## Ankle Snugs

An optional foot positioning accessory to the standard sandal. The **Ankle Snug** offers a unique magnetic buckle fastening mechanism, which can be operated single-handed.

## Sandal Raising Blocks

Available for every size of **Sandals**, the raising block kits give the **Sandals** that extra bit of height where needed! Use to accommodate for leg length discrepancy or use to raise the height of the footplate on any product to maximise the available growth.

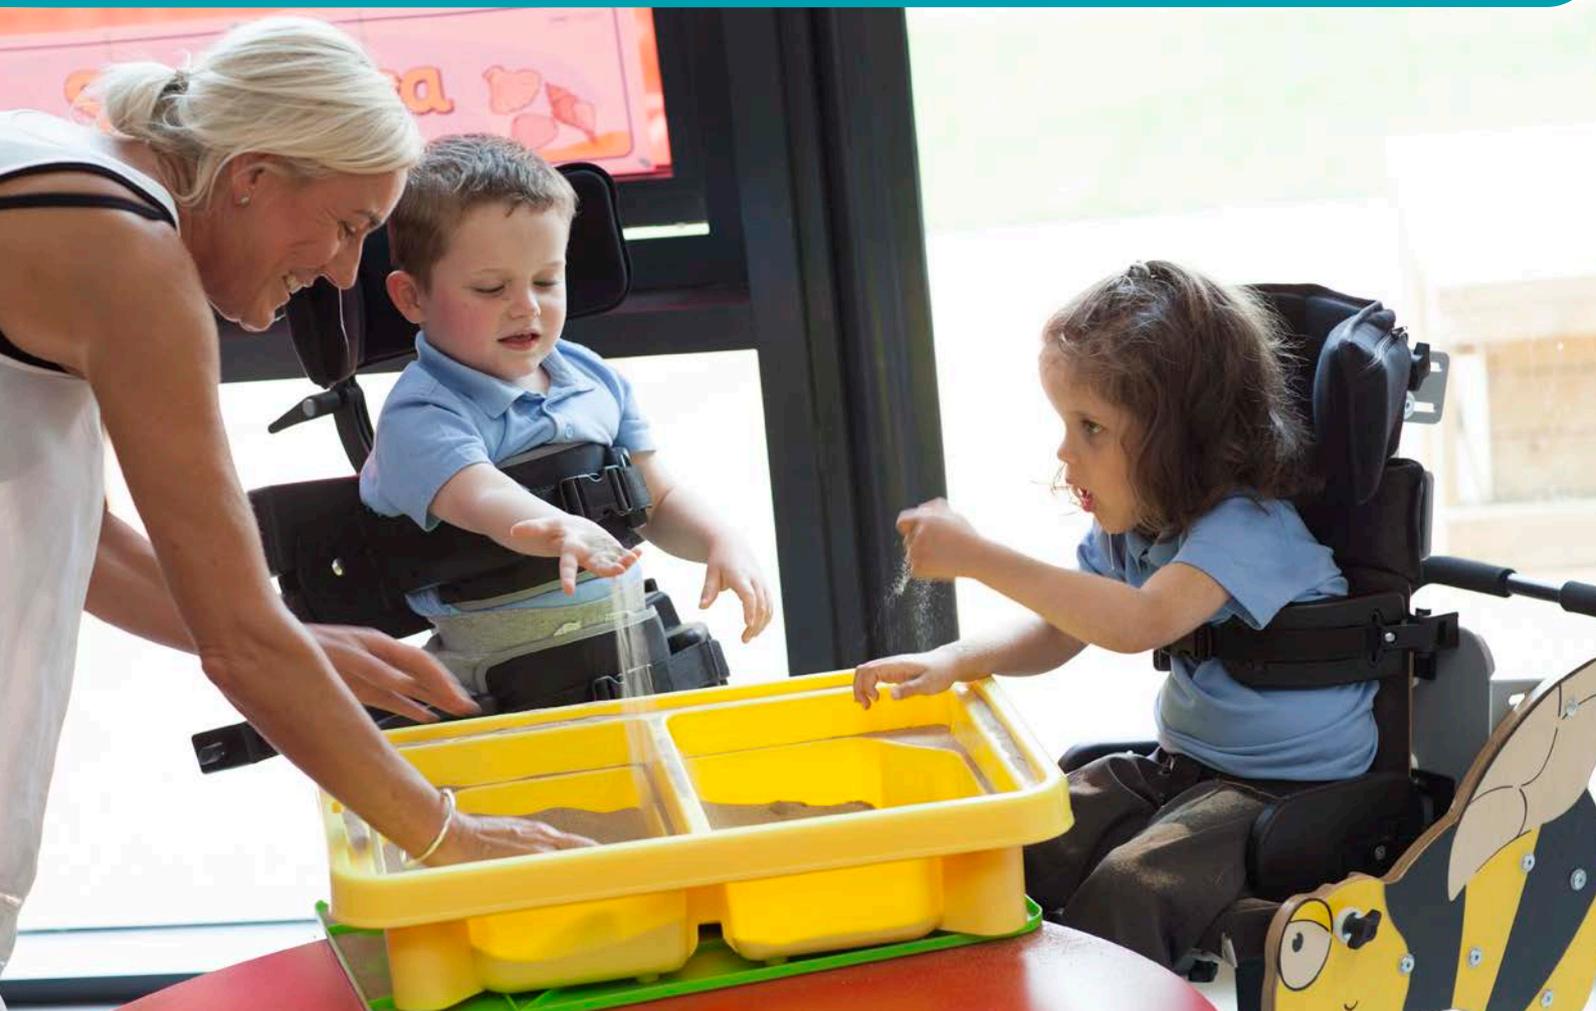

NB: One kit needed per individual sandal.

## Booties

Available for the smallest Jenx seating systems, **Booties** provide gentle and comfortable support for tiny feet even without shoes. They are soft and extra padded with no fiddly straps, press studs or buckles.
