## **B.NOTE LIGHT 40**

Available with no braille keyboard, the **b.note light 40** braille display by *eurobraille* meets the expectations of the real braille readers regarding autonomy and simplicity.

---

## **PRODUCT DESCRIPTION**

With a refined design, this 40-cell version comes out to expand the « Made in France » **b.note light** range and already gets a lot of attention among the blind population.

### **A NEW DESIGN FOR AN IRREPROACHABLE BRAILLE DISPLAY**

Thanks to the USB and Bluetooth ports, the **b.note light 40** will help you take control of your devices such as PC, tablets or smartphones and browsing your applications.

The new ergonomic shape has been adjusted to give this display optimal reading and web browsing conditions, compatible with all screen readers.

eurobraille

Additionally, its simple design combined with sustainable materials provides an unlimited display lifetime for users.

## THE MAIN KEY POINTS

- **b.note light** : compatible with all screen readers.
- **b.note light** : Download docx, odt & pdf files.
- **b.note light** : moving forward & backward on the display with routing cursors keys.

## SAVE TIME AND ENERGY WITH (OR WITHOUT) YOUR FINGERS !

Same as the braille keyboard version, this **b.note light 40** has a built-in headphones port that will allow you to rest your fingers and enjoy the speech synthesis mode.

In order to ease the reading, the routing cursor keys with double-contact function will help you move forward or backward on the display. Of course, the core functions of these keys for right or left-handed are still available.

## YOU NEED A BRAILLE KEYBOARD ON YOUR DISPLAY ?

The « standard » **b.note** has a 10-key (Perkins) braille keyboard and is available in 2 versions :

- **b.note 20** : 20 braille cells + routing cursor keys + braille keyboard.
- **b.note 40** : 40 braille cells + routing cursor keys + braille keyboard.
