COMPANY

# High values since 1999.

**WE are approachable**

More than **manufacturing of aids**

## WE operate sustainably

Full inclusion within our production facilities

## WE produce "made in Germany"

Manufactured in Germany from A to Z

## WE create a sense of safety

Our experience leading to **your sensations**

## WE are on site

Test-ride before purchase

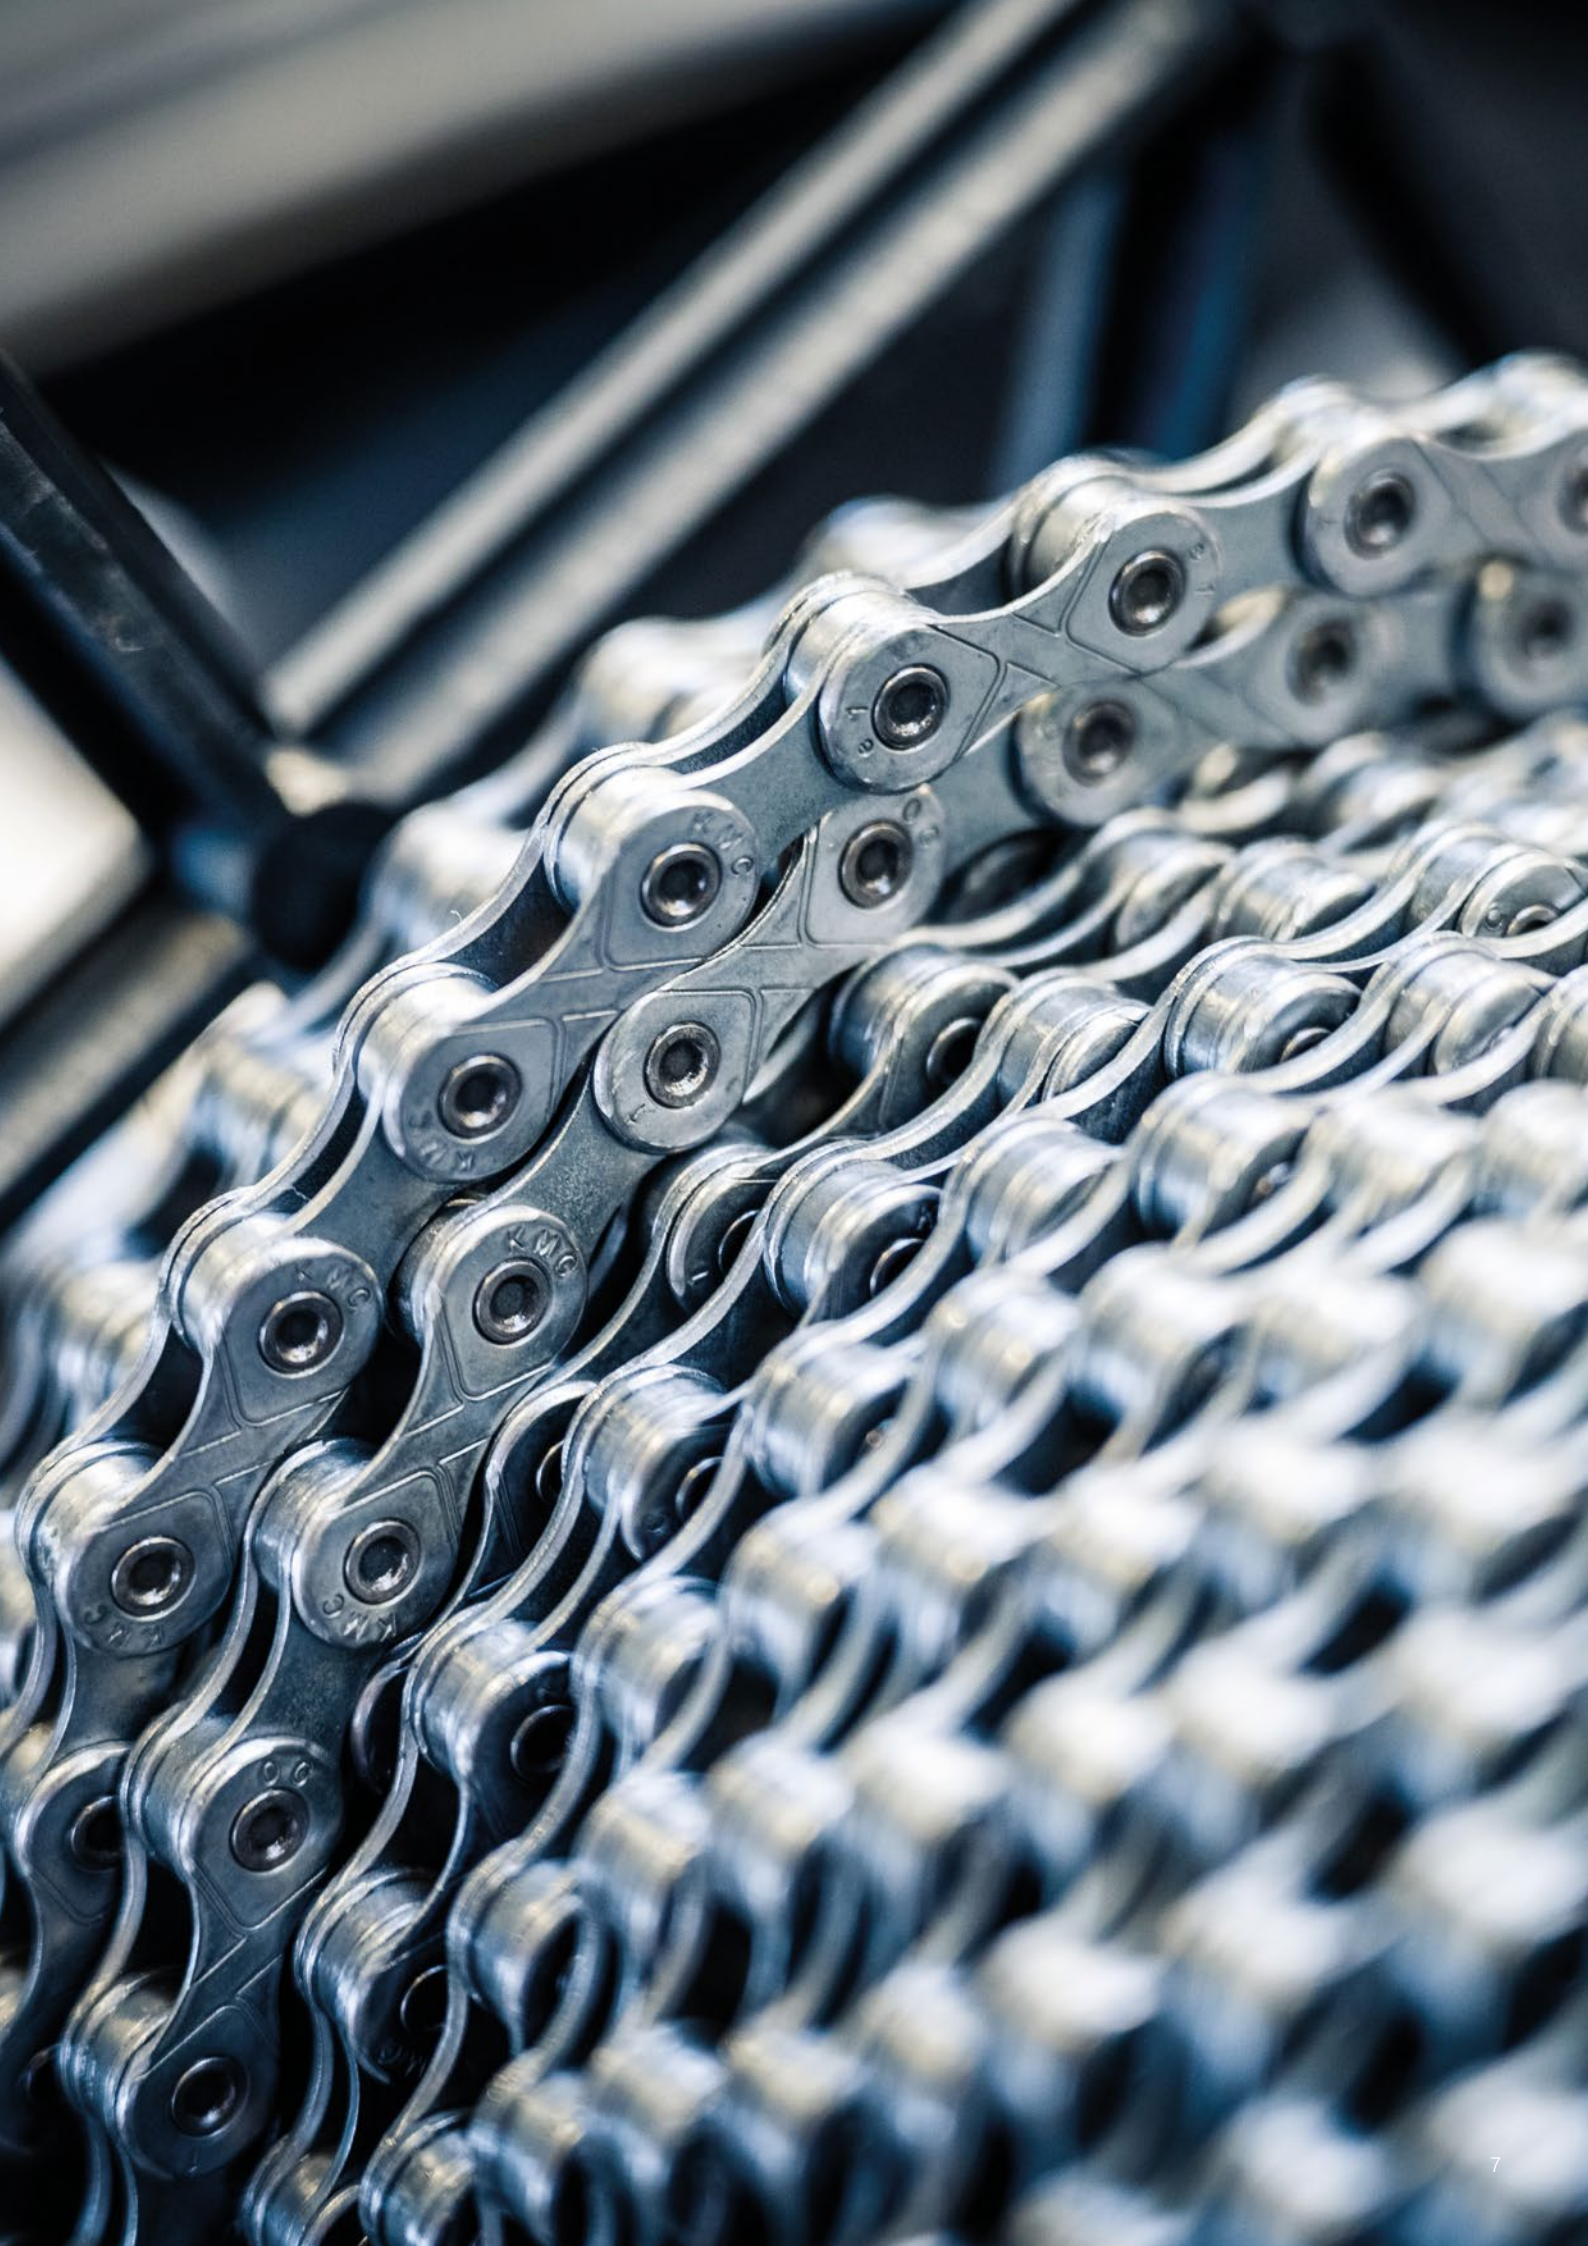

## PHILOSOPHY

# With innovation, expertise, and a lot of passion.

“We strive to facilitate safe mobility solutions for anyone in all situations. The work for and with people with as well as without disabilities is in our focus and shapes our positive corporate culture.”

Close to people, safe in motion. For more than 20 years pfautec has been committed to safe and self-determined mobility solutions across all life situations. With innovation, expertise, and a lot of passion we create proven aids for people with and without disabilities ranging from cycles suitable for therapy to special tricycles for adolescents and adults. We are convinced that future-oriented means of

transport create new dimensions of freedom and quality of life. All of our aids are subject to strict quality controls and are manufactured exclusively inhouse. The close interaction with people is of great importance to us: Every year, people with disabilities start an apprenticeship program in our company, creating the basis for a lively and diverse corporate culture.

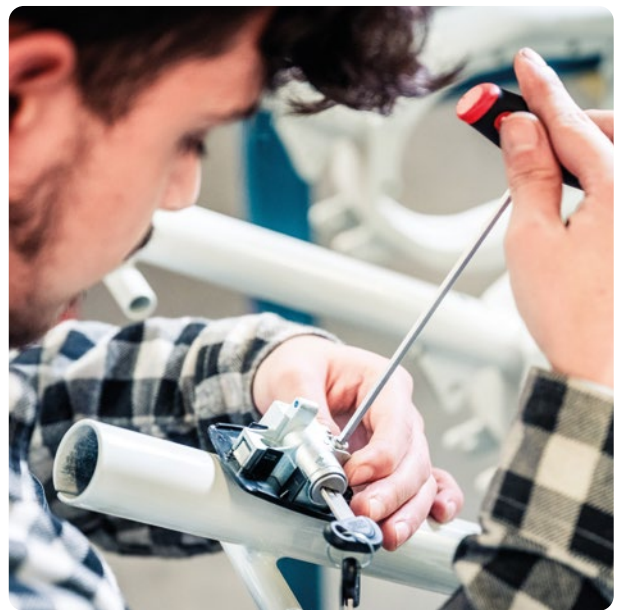

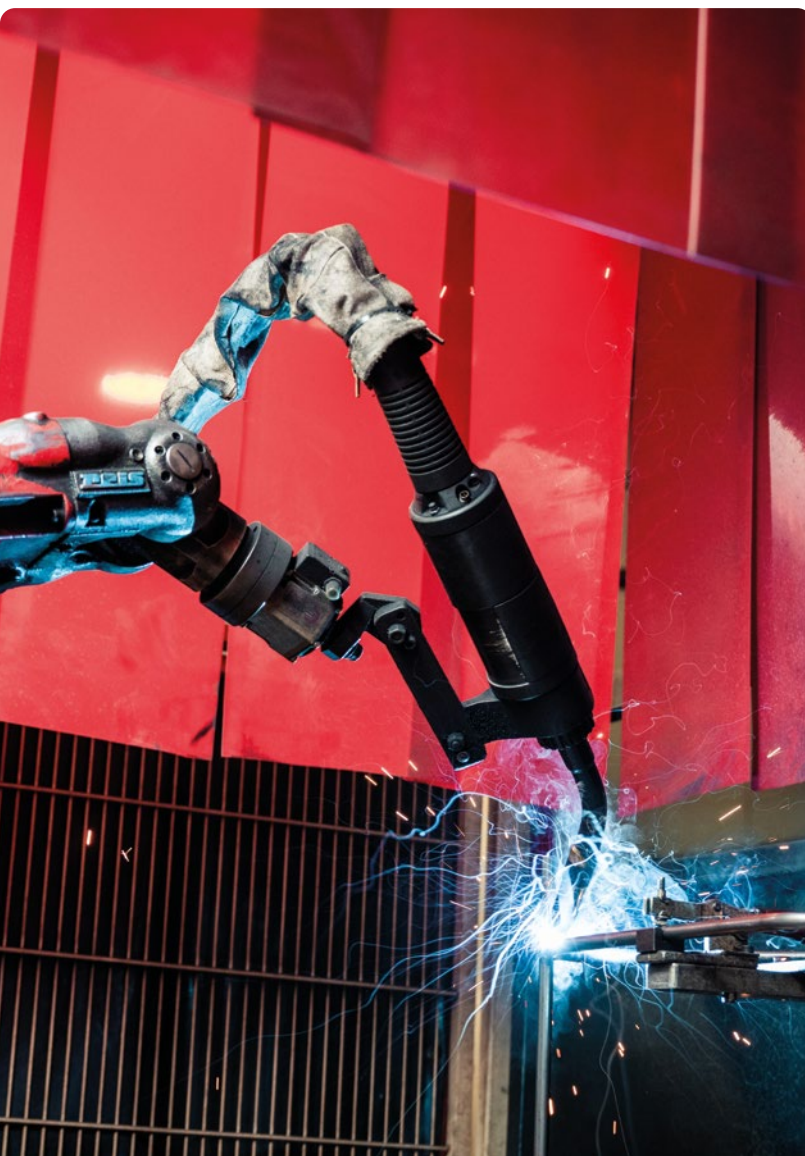

## MANUFACTURING PROCESS

# Compelling quality.

Our proven bicycles and tricycles for everyone are **completely produced inhouse** at our facility in Quakenbrück from initial design, through construction, and to complete assembly.

- ✓ The shell
- ✓ Welding workshop
- ✓ Sandblasting
- ✓ Powder workshop
- ✓ Spoking workshop
- ✓ Warehouse
- ✓ Assembly

## TARGET GROUPS

# We love diversity.

People who feel insecure about riding a bicycle.

A

- ✓ The optimum solution for all needs.
- ✓ Trustworthy, reliable mobility solutions.
- ✓ Security for people with limitations/disabilities.
- ✓ Regained mobility increases the quality of life.

People who lack  
a sense of balance.

B

People who seek more  
safety on the road.

C

People with physical  
and mental limitations.

D

## EFFICIENT

# Beyond city limits.

The Scoobo combines **comfortable and casual cycling** in various situations and lets you effortlessly master even longer distances. The electric tricycle is suitable for extended shopping tours, city trips, and relaxing excursions to the countryside. Simple, safe, and intuitive handling characterize the Scoobo as a comfortable vehicle where you can keep an eye on everything: Handlebars, pedals, gears, and front wheel are in your field of vision. The large and comfortable seat can be adjusted effortlessly in height and inclination, enabling you to sit in a relaxed position and have a good overview of the traffic at all times.

## Reach your destination safely

For those who like to keep things easy. The height and inclination of the comfortable, large seat can be adjusted quickly and easily. This ensures a relaxed seating position as an essential basis to overlook the traffic situation. To exit the vehicle, just take one foot off the pedal and reach the ground while seated.

## COMFORTABLE

# Even during extended tours.

If you want a powerful and agile companion with **enduring power and plenty of seating comfort**, the Combo is the right choice for you. The optimized frame, high handlebars, and wide saddle with back rest ensure plenty of comfort even on extended tours. Equipped with a Bosch drive system and a powerful 500Wh battery, you will rely on the Combo as your everyday life support and a particularly comfortable vehicle concept that is intuitive and easy to use. The large basket also provides plenty of space for everything you need to carry for an all-round relaxing trip.

### Comfortable sitting and riding

The Combo is suitable for all those who desire plenty of comfort. The rear-shifted seat and higher handlebars enable an enjoyable riding experience without physical effort as well as an easy entry to and exit off the cycle. If the saddle is optimally adjusted, you will land comfortably with your feet on the ground while in a seated position.

## COMFORTABLE

# Everything in sight.

The Roma truly is a feel-good electric tricycle which easily lets you activate vigorous support at the touch of a button. This is made possible by the Bosch Active-Line mid-motor system, ensuring optimum electric assistance thanks to its smoothly-running power sensor. The built-in display shows you all the important functions: From the average speed to your daily covered distance and the maximum speed, all this data is accessible to you. A connectable, battery-powered electric light is also included. Good to know: This electric tricycle does not require a driver's license nor insurance.

### Safety during extended tours

Optimum electric support thanks to power sensor and a long range of up to 65km – the Roma is the ideal companion for longer distances. This electric tricycle provides energetic support at the push of a button. The display shows all important functions at a glance. A connectable, battery-powered electric light is also included.

SAFE

# On the move in ongoing traffic.

You are always on the finishing line with the Passo. If you do not fancy technical gadgetry and simply want to be on the move on a bike with automatic functions, this electric tricycle is your ideal companion. The struggle to find the right gear is finally a thing of the past with the powerful Shimano Steps E6100 drive system and a 5-speed automatic gearbox. High safety standards, hydraulic brakes, and a parking brake round off this tricycle. The 24-inch wheels ensure a low centre of gravity, which means you will enjoy a particularly safe riding experience. All important functions of the display, mounted on the handlebars, are controlled by two push buttons that guide you through the menu intuitively.

## Strong support for your back

Passo is just made for anyone who likes to be on the road in a simple and uncomplicated way. It combines a quiet, yet powerful motor system with automatic gear shifting, allowing you to concentrate fully on your ride. Enjoy your surroundings and let the technology of this tricycle support you: Passo gives you a lot of freedom on your tours thanks to easy handling and technical intelligence.

## POWERFUL

# Ahead on four wheels.

Our Tibo4 is a particularly **powerful and comfortable recumbent four-wheeler**. Powered by a Bosch Performance-Line drive system and equipped with a 500Wh battery as well as hydraulic disc brakes, this model will push you forward relentlessly on all your endeavours. The height and inclination of the comfortable, wide seat can be adjusted quickly and easily, putting you in the right position for longer-lasting trips. Thanks to intuitive operation and stability on four wheels, you may always rely on this sporty companion at your side.

## Always comfortable on the road

The height and inclination of the comfortable, wide seat can be adjusted quickly and easily, putting you in the right position for longer-lasting trips. The whole thing is combined with the powerful Bosch Performance-Line motor including a 500Wh battery and hydraulic disc brakes.

- 3 Ansmann front motor system · 324Wh battery

## INTUITIVE

# Constantly riding in a casual way.

The ScooterTrike combines comfortable and casual riding in an upright seating position with intuitive operability, enabling you to master long distances effortlessly. This is because the motion sensor of this recumbent electric tri-cycle does not depend on the applied pedalling force, but on the crank rotation. The 16-inch front wheel performs with excellent manoeuvrability on urban and rural routes, following the motto: hop on and ride off. This makes the Scooter-Trike an ideal beginner tricycle. Good to know: This model is also available with electric drive called **ScooterTrike FM**.

## Comfortable on the road

The ScooterTrike is designed for those who like to feel comfortable. The height and inclination of the large seat can be adjusted quickly and easily. This ensures a relaxed seating position from which the traffic situation can be assessed effortlessly at all times. To come to a total stop, simply take one foot off the pedal and reach the ground while seated.

## COMFORTABLE

# Relaxed sitting position.

A wide saddle, back support, and low entry are great characteristics of a comfortable and safe companion, reflected by the Comfort model. Its rear-shifted seating position enables easy entry into and exit off the tricycle, while the small back rest offers stable support for long-distance touring. Good to know: The Comfort also is available as a motorized option, the Comfort FM.

## Enjoying the view

The name says it all. A lot of comfort, convenience, and safety are awaiting the rider of the Comfort. If the saddle is adjusted correctly, the feet can reach the ground in a seated position. The optimized frame and thus resulting rear-shifted seating position imply a certain sense of stability, which lets you enjoy the surrounding view.

## SPORTY

# Travelling in style.

Trizon admittedly has quite a lot of history: As a further development of the ScooterTrike model, this tricycle offers plenty of sporty riding pleasure, where hydraulic disc brakes, a smooth-running 7-speed Nexus freewheel hub by Shimano, and a thought-out frame design come together. The height and inclination of the comfortable, large seat can be adjusted, so that you always have a good overview of your surroundings in a comfortable seated position. To come to a full stop, simply take one foot off the pedal and reach the ground while seated.

## Comfortably from A to B

Trizon combines a sporty, safe, and comfortable vehicle concept that is intuitive to use. The height and inclination of the comfortable, large seat can be adjusted in no time at all, ensuring a relaxed seating position. To come to a full stop, just take one foot off the pedal and reach the ground while seated.
