

Attractive, safe living & sleeping spaces
& high sided beds for people with complex needs

FIND OUT MORE AT

[SAFESPACES.CO.UK](https://safespaces.co.uk)

Welcome to Safespaces®

At Safespaces, we supply custom made safe rooms, high sided beds & sleep areas for use at home, in schools, hospitals, for respite care or travel. Our equipment is designed for adults & children who may be unsafe in an ordinary room or bed. We supply products for people with additional, sometimes very complex needs, including autism, epilepsy & behaviours that challenge. In hospitals & respite centres, our products have enabled people with complex needs to receive treatment.

We provide wrap around customer service, working closely with parents, carers & professionals to develop products which are right for the people using them. Our team will support you through every stage of the process from initial enquiry to design, installation & aftercare.

At Safespaces we help you to get the most out of our products and extend their life. We offer a steam cleaning & maintenance service. Our rental options may offer a cost effective solution if your needs change over time.

If you would like more information, or to see any of our products, please contact us by phone, web chat or email to discuss your requirements.

Reviews of our products by the people who use them, their parents, healthcare professionals & teachers.

Max used a Safespace for 11 years. Without it his family would not have been able to keep him at home.

www.safespaces.co.uk/safespaces-films

Choosing Your Product

It is very important that you choose the right product to meet the needs of the individual using it. Our skilled customer services team can guide you through the process of choosing the appropriate product & designing it to meet your specific requirements. You can choose the size & colour of your safe room or bed as well as features, such as where windows & blinds will be, or whether you want a white wall for use with projectors or other sensory equipment. A good place to start is to look at our website, & watch the films showing how our products are used at home & in a school environment.

Don't take our word for it, parents headteachers & healthcare professionals who have experience of our products can tell you about the benefits they have brought.

"Our little lady can't & doesn't say much & you don't often get a reaction from her, but the Safespace got a huge clear 'Oooh wow!' when you delivered it. She loves it. She likes her own space sometimes, & now she can retreat to her new room & play safely. She's sleeping better through the night too & we all (her 3 siblings too) feel more relaxed. It puts our minds at rest knowing she is safe & happy when she wakes in the night, & when she's trying to bang her head in frustration she can't hurt herself. So a big thank you from us all. It really is a genius idea & a solution to many safety problems."

Joanne Balausiak, Cumbria

Product Colours

We recommend light blue walls with a contrasting colour for floor & detailing. Our customers have told us these have the most calming effect. Please see our website for our full range of colours, or contact us for details.

Safespaces Website

Information on our website includes: photo gallery, reviews, films, interviews with families, care & education professionals and forthcoming events where you can try out the Safespace & other products for yourself. You'll be able to check the latest product information before making a purchase. We welcome your call to discuss your specific needs. Our office is open 9am - 5pm Monday - Friday or you can email us at: info@safespaces.co.uk.

Safespace® Hi-Lo

A Safespace with a robust, height adjustable base

"The Safespaces team have been fantastic from planning & installing to funding advice & support. We are delighted with our Safespace & the safety it provides our little boy both now & in the future."

Kate Vann, Leicester

Cosyfit Hi-Lo®

Cosyfit with a height adjustable and Trendelenburg base

Cosyfit Hi-Lo® (Electric Profiling)

Height adjustable Cosyfit with electric profiling

Safespace Siesta® Hi-Lo

Siesta with a robust, height adjustable base

The Benefits

We have been listening to families & professionals for the last sixteen years & they have told us what they want from our products. This information has informed our design process helping us to make products that really meet your needs...

"Connor has settled in his Safespace quite quickly & seems to really enjoy his own space. For the first time in 10 years he has slept soundly all night long for 4 nights in a row this week. The Safespace is worth every single penny & thank you so much for making our lives so much better."

Kate, Tracey and Connor Hitchings,
Andover

...AT HOME

Often the equipment has enabled someone to stay in the family home when it didn't seem like this was possible. Parents have also told us about the benefits the product has brought to the whole family & have frequently reported that the person using the equipment has settled more quickly & has begun to sleep regularly, often for the first time in years. This has also allowed parents & carers to recharge their batteries, as well as allowing them to meet the needs of other siblings.

...IN SCHOOLS

Safespaces have enabled pupils to find better ways of dealing with challenging behaviours/develop their independence skills as part of a behaviour support plan, & to remain in the classroom & return to the lesson more quickly.

...IN HOSPITALS

In hospitals & respite centres, our products have allowed people with complex needs to receive treatment in a safe, hygienic, high sided bed that can be adjusted for care needs. Our products reduce the risk of harm for someone who would be unsafe in an ordinary bed.

"For the second time since the Safespace was installed Daniel is now in the process of having his medication reduced. This medication has previously kept our son on the island where the only other alternative for him was a mainland placement at huge emotional & financial cost. We would not have thought this reduction possible without the Safespace."

John, Shona, Mark and Daniel, Isle of Lewis, Scotland

"Sarah absolutely loves it & wants to go straight in it when she gets home from school. She plays in it with her able bodied sibling & this has provided them with a forum in which they can safely play together, which is otherwise very difficult. In addition she is now happy to go to bed, it has regulated her sleeping patterns & on those nights when sleep doesn't happen for her we can rest assured that she can come to no harm."

Sarah Trevitt, North Somerset

"Having a Safespace has really changed the lives of both children & families we work with for the better. Children love the fun cosy space & their sleep is often dramatically improved by having a low-stimulus & consistent environment. Families who have been at breaking point with long-term sleep deprivation suddenly find peace of mind & a new lease of life once the Safespace is installed."

The company have a wealth of experience and work closely with families & professionals to ensure the finished product is exactly right for the child. It is a very flexible product which is made specifically to fit both the bedroom space & the young person's ongoing needs."

Katie Latham, Senior Children's Community Occupational Therapist, Pontefract

would look like in
your home.

"The Safespace has helped George's bedtime routine. Prior to the Safespace I would have to settle George which took anything from one to three hours & sometimes failed altogether! Whilst I was settling George upstairs it left my older daughter Lucy (13) downstairs on her own for long periods of time. However, with the Safespace, bedtime is a very different experience! We can put on the sensory equipment & just sit quietly next to George & hold his hand & he will generally fall asleep within 30-45 minutes snuggled up in a relaxing, calm & safe environment. In the three short months we have had the Safespace we have seen huge improvements with George & our whole family. George settles much better & is increasing his independence at bedtime."

Kate Vann and George,
Leicester

Who it's for

The Safespace is designed for those with autism, epilepsy, behaviours which challenge & profound multiple learning difficulties, including those with full mobility. It provides an extremely robust space that can be kicked, punched & head-butted. It can withstand the roughest treatment by both children & adults. It provides a space in which someone can sleep, move, roll or play freely, reducing the risk of injury by eliminating hard surfaces.

Visit www.safespaces.co.uk/safespaces-films to see films of Safespaces being used at home and in schools.

Uses

A safe bedroom, playroom or chill-out space

A Safespace can make a huge difference when a person has safety issues, poor sleep patterns or behavioural difficulties. It can provide a safe play space, sleeping space or a calm area. Families often report a big improvement in the life & well-being of the person using it and a positive impact on the whole family.

Sleep

A Safespace creates a low stimulation environment which can help with settling at bedtime & improve sleep patterns. It can also provide a safer environment for those who continue to wake at night.

Sensory room

With the option of a white wall & lighting effects, such as our fibre optics kit or special effects projector (see Accessories), the Safespace makes an ideal sensory room.

Independence & privacy

A separate space to be on your own, to express feelings, especially when upset or agitated, can often be denied to those who need high levels of supervision. A Safespace provides a safe private space, particularly important during the teenage years. This personal space can support the development of behaviour self-management.

Family life

Having a member of the family with challenging behaviour can be difficult for everyone. Siblings, as well as carers, may have their sleep disturbed or be at risk of injury. The Safespace can enable a family to have a more balanced everyday life. It has been described by parents as bringing 'peace of mind' into the family home.

Features

Each Safespace is custom-made, with a door & window, aligned with the door & window of your own room. This allows for the use of curtains, light fittings, radiators & electric sockets, television, music & sensory equipment. This helps to create a light, airy, comfortable space, much more attractive & versatile than conventional room padding.

Room sizes need to be at least 25cm (10") wider than the Safespace on each of the four sides to allow the walls to flex out safely.

Options

Roll up wall – this can be added if access is required through the Safespace to reach fitted wardrobes.

Viewing panels – these can be added to enable the person using the Safespace to watch television or enjoy sensory equipment situated outside the Safespace. These can vary in size as appropriate. If a very low stimulation environment is required, we would not recommend the addition of viewing panels.

Projection screen - an internal white wall can be included in the design of the Safespace. This can be used as a projection screen. (see Accessories page).

Accessories

Standard water resistant mattress – most customers also purchase a Safespace mattress 20cm (8")

Water resistant Lycra – covered memory foam top mattress 20cm (8")

Water resistant PVC – covered memory foam top mattress 20cm (8")

Water resistant floor/wall seams

Soft play & soft furniture, Blinds, Projector & Fibre Optics

"Right from the beginning, I've felt like a valued customer. I've been a bit of a pain, changing my mind halfway through as we decided to move Callum into a bigger bedroom, meaning the entire Safespace had to be redesigned. Never once was I made to feel like I was a burden. Not only that, but you had to order in a special fabric, just to meet Callum's needs...The two gentlemen who delivered & installed the Safespace were polite, courteous and 100% professional... They explained how to care for the Safespace which included operating/cleaning instructions."

**Jen Beaumont,
Bradford**

Safespace® Hi-Lo

For those who require a greater degree of nursing care & the flexibility of a height adjustable platform, the Safespace Hi-Lo provides a comfortable working height for most carers. There are no moving parts or hard surfaces inside the Safespace compartment, providing a soft, safer sleeping area. See our website for more details or contact us for up to date technical specifications.

Safespace[®] in schools

Safespaces have proved invaluable in special & mainstream schools all over the country. They provide a calm, low stimulation environment, an asset in busy classrooms. Safespaces can help where there is a wide range of needs amongst students. We recommend you watch our film showing how Safespaces are used in schools.

▶ Safespaces Films

See Karen Alty, Deputy Headteacher at Holly Grove Primary School on Safespaces Films online at www.safespaces.co.uk/safespaces-films or we can send you a free DVD.

Uses

A calm space

A Safespace can provide a low stimulation area, which pupils can use to settle in, or have quiet time in a busy classroom. Pupils can use the Safespace as a means of managing their own behaviour, by requesting time in it when they recognise their stress levels are rising.

Therapy and sensory space

Safespaces are used as one to one therapy spaces & as safe areas in which to enjoy sensory equipment. Time in a sensory Safespace can be offered as part of positive reinforcement. The netting roof, viewing panels & optional white wall allow for the use of projectors & sensory lighting. We can provide sensory lighting, soft play shapes & furniture, in order to create a beautiful and safe, sensory environment.

Crisis management

Many schools offer parents the option for a Safespace to be used as part of a crisis management plan for their child. It can help reduce the incidence of crisis situations & be used as part of a restraint reduction plan. It can be used as a less restrictive option than manual "holding," to prevent physical injury to others from an agitated student. This can mean that relationships with staff members are not damaged by the use of more restrictive practices. The Safespace may be positioned in the corner of a classroom to allow a rapid response to incidents & enable the pupil to remain in the classroom & return to the group more quickly.

"We are a large open-plan mainstream school. Our Safespace is used for both a chill out area for sensory breaks, with lights & toys and as a calming down area. It is primarily used for one individual with severe autism. It is detailed in the behaviour protocol as the most suitable place for the child to go when they are getting physical & needing a safe soft area to calm down. It has helped to keep both the child and staff safe. The child understands that it is their place to work out frustration. This also ensures that the other youngsters are not disturbed while working in class. It has been a real asset to our school."

Duncan Mackay, Head of Craighill Primary School, Inverness

Versatility & Practicality

A Safespace can be installed with minimal disruption to the classroom, avoiding the need for structural building work & so, reduces costs. It can be dismantled & moved to where it is most needed, for example, when a pupil or class moves to a new classroom. This is a key reason why many schools have chosen a Safespace instead of room padding. Training in installation is available upon request.

A Safespace can be made to measure to fit a small classroom, or placed in the corner of a larger classroom or hall. Most schools choose our **standard** 2m x 2m Safespace in light blue with a dark blue floor. This requires a minimum overall clear floor area of 2.5m x 2.5m to accommodate the Safespace.

We can also provide a **custom designed** Safespace for either a smaller room or a large classroom or hall. Window blinds can be supplied to provide privacy or to create a low stimulation environment.

For a written quote & design, please ask us for a **Design Your Safespace** schools pack also available on our website. All we need is some basic information about your classroom.

"The Safespace works well as part of a strategy written into Behavior Support Plans and alongside approved techniques. Pupils find it a supportive place to be in & will often ask to go in there to play."

CD Wilson, Headteacher, Springhead SEN Specialist School, Scarborough

"We are currently using our Safespace as (a) a chill-out room/calm down space for children who present with challenging behaviours, (b) a therapy and sensory space, (c) a cushioned area where children can make themselves comfortable and share a story with a grown-up. Although only in its infancy at Old Town, the Safespace is already having a positive impact on many of our children. The service we received was super and there was regular communication throughout the designing process to ensure that the bespoke Safespace was tailored to the exact specifications of our chosen space within school. The installation team were extremely professional and hard working in building the Safespace – in fact they were only on site for a minimal amount of time. We are extremely grateful to all of the Safespace team for all of their hard work and for making the design and installation so easy."

Douglas Gubbins, Deputy Headteacher and Inclusion Leader, Old Town Infant School and Nursery, Poole

Products in Hospitals & Respite Centres

Safespaces products can provide an innovative solution when someone with complex needs requires treatment in a height adjustable or high sided bed.

Our attractive, easily cleaned beds, designed with the involvement of NHS staff, come either with a netting roof or open top, windows, roll up blinds for privacy, tube holes where you tell us they are needed. Our design meets strict hygiene requirements. Over forty NHS Trusts across the UK have bought Safespace products for use in hospitals, care homes or at home. We can provide cleaning, maintenance or transfer service on request.

Examples of how our equipment is used in hospitals:

- We have installed a Safespace Hi-Lo on the Child Health & Assessment Ward at Preston Royal Hospital.
- Leeds Royal Infirmary have used our equipment in their Paediatric Surgery Unit.
- John Radcliffe Hospital in Oxford have a Siesta in their Trauma Unit.

"We use the Siesta a great deal of the time now. It has prevented a great deal of safety incidents for us."

Jilly Heath, Trauma Unit, John Radcliffe Hospital, Oxford

If you'd like us to come & talk to you about which of our products are suitable for use in hospitals, respite centres or care homes, we can meet you or provide a demonstration for your team, deliver a presentation about how the products can be safely & appropriately used and address any queries you may have.

Rentals

We now offer a product rental service for all of our products. The minimum period of time is one calendar month. Products will be delivered & collected after use. This is particularly useful for short term use, such as a hospital stay or also as a trial where an Occupational therapist can rent a product for a client to check that the product is suitable. The majority of clients who rent our products decide to buy afterwards.

Cleaning Service

We also offer a cleaning service. This is particularly useful where products have multiple users, or for loan schemes. The product can be collected, & returned in a clean condition for re-use. This helps to extend the life of our products maximising their benefit.

"We are a short break unit and therefore need to cater for all manner of disabilities. The Cosyfit Hi-Lo is ideal for our purposes, it has resolved several issues that we had. We use it instead of a hospital bed with cot sides and it is much safer. We now have children able to watch TV in bed (through the plastic [window]). We have always had excellent, quick service from your company."

Manager of a short break unit,
Lancashire

"We purchased the Hi-lo bed for a 75 year old lady who had significant behavioural problems & was at high risk of self harm using standard equipment. Having researched the market, & on advice from an occupational therapist, this bed fits the bill. It has proved successful in allowing us to care for her in a safe environment & prevent any injuries to herself."

Tony McGarry, Service Manager, St John's Care Home, Darlington

Safespace Siesta®

"Choosing the appropriate bed for our service was a lengthy process. Having finally chosen the Siesta, we feel that it can provide a safe environment and ensure that the children get a good night's sleep."

Clare Paine, Deputy Manager, Children's Respite Centre, Warwickshire

A versatile, strong & comfortable high-sided sleep area, suitable for those with limited mobility

Who it's for

The Siesta is designed for those who may have a lot of movement and strength, but are unable or disinclined to pull up or climb over the high sides. The customisable design makes it suitable for those with complex or varying nursing needs & those requiring a hoist. Its robust 'flex-out' sides can be kicked, punched, head-butted or rocked against, & help keep a person safe from injuries & from falling against hard surfaces, for example during seizures.

Uses

The Siesta creates a safe, low stimulation environment that promotes easier settling at bedtime & improves sleep patterns, providing a safer environment for those who continue to wake at night.

The Siesta's versatility & easy clean design make it particularly suitable for hospital settings or other situations where a wide range of clients' needs can be accommodated by one extremely tough and versatile piece of equipment. Opening panels on up to all four sides, allow access for nursing and care, including head end for emergency resuscitation.

Features

The Siesta is made with the same heavy duty PVC fabric as all of our products, supported on a strong frame & base. The walls flex out to absorb impact & so require a clearance of 25cm (10") from any hard surface.

The Siesta can be jet washed, or the fabric can be easily removed for steam-cleaning, to support infection control.

Opening panels can be zipped open & clipped back, or rolled up for ease of access.

Viewing panels allow in light, create a sense of space, and facilitate observation & communication between client & carer, which can be restricted by other designs of high sided beds. A viewing panel at the foot end can allow the client to watch television or enjoy sensory products.

The Siesta has a raised platform to accommodate mobile hoisting & an open top to accommodate ceiling track hoisting. The Siesta comes with a 15cm (6") mattress as standard or can be used with other specialist mattresses.

Options

Roll-up opening sides and viewing panels – The Siesta comes with 1 roll-up opening side, with an inbuilt viewing panel as standard. Extra opening sides, with or without viewing panels, can be added. A non opening side with an extra viewing panel is also an option.

Floor/wall fixings – for additional stability or slippery floor surfaces.

Closed padded side – allows the Siesta to be situated closer to a wall.

Access holes - can be provided to your specifications for gastrostomy, oxygen or other tubes.

Accessories

Water resistant Lycra-covered memory foam top mattress 15cm (6")

Water resistant PVC-covered memory foam top mattress 15cm (6")

Manual profiling set – a foam wedge for 2-position back support & a cylinder roll to act as a knee break.

Fibre optics kit

For more details see Accessories on page.

Safespace Siesta® Hi-Lo

For those who require a greater degree of nursing care & the flexibility of a height adjustable platform, the Siesta Hi-Lo provides a comfortable working height for most carers. There are no moving parts or hard surfaces inside the compartment, providing a soft, safer sleeping area. See our website for more details or contact us for up to date technical specifications.

a robust, high-sided
sleep area, which can
be easily dismantled
& stored

"The young man's parents were sceptical when I first suggested one, but as we had one in our stores, I persuaded them to at least trial it. After all, they had not slept properly for 13 years. I phoned to see how it was going after approximately 6 weeks. His father was raving about it. 'It is unbelievable!' he said. His son sleeps all night, every night since he's had it. They are so happy, as they have never had so much sleep. Their son shows his new bed to everyone who visits the house."

Gordon Heath, Senior Occupational Therapist, Cannock and Lichfield Children's Disability Service

Who it's for

The Cosyfit is designed for individuals with limited mobility & is robust enough for adults & children who may rock, thrash about, push or kick. For those with the ability to stand, walk, pull to standing or climb, we usually recommend the Safespace. The Cosyfit also creates a safe environment for those who may otherwise be restricted to a wheelchair.

Visit www.safespaces.co.uk/safespaces-films to see a film of the Cosyfit in use.

Uses

It is used mainly as a safe bed for those at risk of falling or hurting themselves on metal or wooden bed surrounds. Its soft, high sides, open top & large viewing panel create a comfortable sleep area.

The large viewing panel on one or both sides allows light in & creates a sense of space, whilst allowing the user to watch television or enjoy sensory equipment. This also helps with communication & reduces the feeling of isolation or containment experienced by those in beds with very high sides.

Users will often seek it out at other times too, to relax or play - a place to feel safe in. The Cosyfit provides much needed peace of mind for carers & parents, reducing anxieties about injuries from falls, rolling & seizures. Noise levels are reduced as there are no hard surfaces. The Cosyfit can be quickly & easily dismantled for storage, making it ideal for respite centres & care homes.

Features

- 3 reinforced padded side panels & 1 opening side with a mattress as standard.
- Can be pushed against a wall where space is limited.
- Front panel can be fully opened & fastened to the side, providing a large open area.
- The low floor makes it easy to step into.
- Easy to dismantle and store.
- Can be used with a ceiling track hoist or adapted for use with a mobile hoist.

Options

Access Holes – can be provided to your specifications for gastrostomy, oxygen or other tubes.

Accessories

Soft side with viewing panel – comes with one as standard with the option for a second on the opposite side to create more light & allowing access for carers from both sides.

Water resistant PVC – covered memory foam top mattress 15cm (6")

Water resistant Lycra – covered memory foam top mattress 15cm (6")

Platform – if a mobile hoist is required we can supply a platform to raise the Cosyfit to accommodate this.

Manual profiling set – a foam wedge for 2-position back support & a cylinder roll to act as a knee break.

Fibre optics kit

For more details see Accessories on page.

Dimensions

Usually single bed size and 147cm (58") high as below.

External length, width & height 198cm x 107cm x 147cm (78" x 42" x 58")

Internal length, width & height 183cm x 91cm x 132cm (72" x 36" x 52")

Mattress depth 15cm (6")

Custom sizes up to 200cm x 200cm (79" x 79"). The height can be reduced to 100cm (39") depending on the mobility of the user.

"Even though it has only been a short time since it arrived Joseph's sleeping pattern has shown improvements & this has been of great benefit to all the family. For the first time in nearly seven years we overslept due to Joseph's improved sleep! I can usually rely on him to wake the entire household anywhere between 3am & 6am. Last Monday I was horrified & yet delighted to find that it was 7.30am & no one else was awake! It's the best thing we've ever got for him."

Christine Francis, Wirral

a high-sided, height adjustable bed with Trendelenburg option

"We are a short break unit & therefore need to cater for all manner of disabilities. The Cosyfit Hi-Lo is ideal for our purposes, it has resolved several issues that we had. We use it instead of a hospital bed with cot sides & it is much safer. We now have children able to watch TV in bed through the window. We have always had excellent, quick service from your company."

Sue Sewell, Manager of a residential respite unit, Lancashire

Who it's for

Designed for those who cannot stand, but who have the strength or capacity to rock, thrash, push or kick & so need safer bed sides. It is used both in the home and in residential and care settings.

Uses

The robust, yet soft, padded high sides provide protection for those at risk of falling out of bed or hurting themselves on hard bed surrounds & other hard surfaces. They are strong enough to withstand the pushing & kicking of most adults, as well as children.

The large viewing panel on one or both sides allows light in & creates a sense of space, whilst allowing the user to watch television or enjoy sensory equipment. This also helps with communication & reduces the feeling of isolation or containment experienced by those in beds with very high sides.

The Cosyfit Hi-Lo can improve the quality of life for those who may spend long periods in bed but who need high sides for their own safety.

Features

- Comprises a Cosyfit on a Hi-Lo bed base with electrically controlled height-adjustable and Trendelenburg options.
- The Cosyfit can be removed from the Hi-Lo base & can be used separately.
- Suitable for use with ceiling track & mobile floor hoists.
- 3 padded side panels & 1 opening soft side with a mattress as standard.
- Can be pushed close to a wall where space is limited. (padded sides only)
- Front panel can be fully opened & fastened to the side, providing a large open area.

Options

Access Holes - can be provided to your specifications for gastrostomy, oxygen or other tubes.

Accessories

Soft side with viewing panel – comes with one as standard with the option for a second on the opposite side to create more light & allowing access for carers from both sides.

Water resistant PVC-covered memory foam top mattress 15cm (6")

Water resistant Lycra-covered memory foam top mattress 15cm (6")

Manual profiling set – a foam wedge for 2-position back support & a cylinder roll to act as a knee break.

For more details see Accessories page.

Cosyfit Hi-Lo® (Electric Profiling)

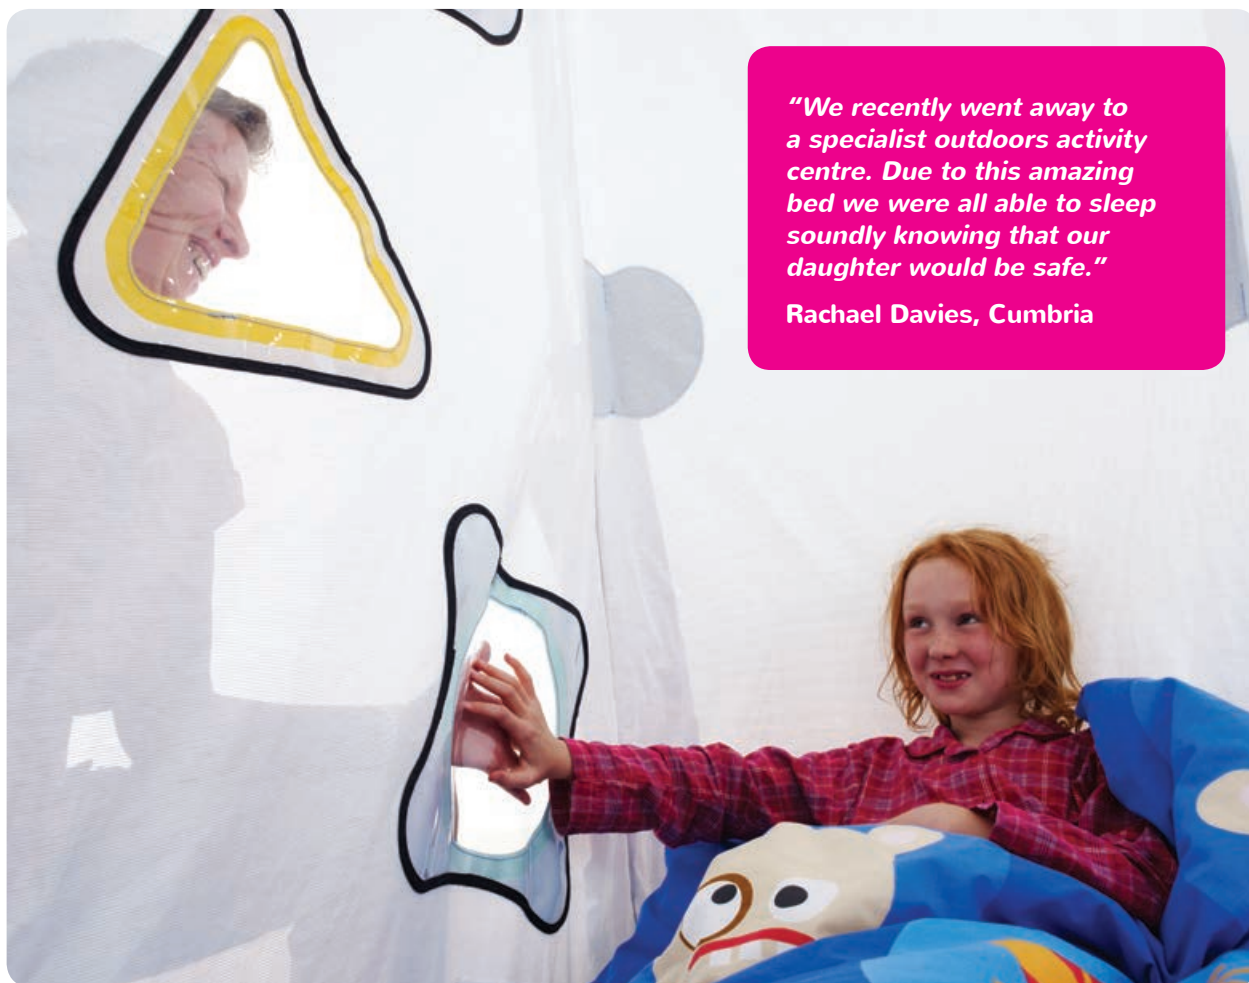

For those with extremely limited mobility who need support with sitting up & raising themselves, we offer the Cosyfit Hi-Lo (Profiling) option. The backrest & knee break functions, as well as tilting, reverse tilting & height-adjustability, provide support with many aspects of nursing care.

Usually provided with sides up to a maximum height of 76cm (30") & as with all profiling beds, is suitable only for those who cannot climb over the raised backrest & knee break. Higher sides only provided where risk has been fully assessed.

For more mobile clients we would recommend the Cosyfit Hi-Lo which can have higher sides, with the optional Manual Profiling Set. This consists of a foam wedge for 2-position back support & a cylinder roll to act as a knee break.

a safe, transportable bed for holidays & trips away from home

Who it's for

The Voyager is suitable for respite care for those who are uncomfortable in unfamiliar surroundings or are used to a safe room.

To check suitability please see the product information on our website or contact us to discuss.

Visit www.safespaces.co.uk/safespaces-films to see a film of the Voyager in use.

Uses

Going away on holiday - or even a short visit - can seem like an impossible dream for many parents & carers struggling with behavioural difficulties & safety issues. The Voyager provides a safe, low-stimulation environment, in which a person can settle at night when away from home. The soft walls & floor mean there are no hard surfaces inside, reducing the risk of injury. Carers and family can relax - a real holiday for everyone!

Features

The Voyager is a free-standing structure consisting of a robust, but lightweight, aluminium frame, from which the soft sides can flex out on impact, requiring a clearance of 30cm (12") from any hard surface. It has an integral PVC netting roof, with standing room inside. It comes with a system of water-fillable ballast bags which create additional stability. A securely fitted inflatable mattress (with pump included), provides a comfortable, but easily transportable base. Several fun viewing panels & the white PVC netting walls, allow carers to see in & help to create a sense of space for the person inside.

The Voyager packs away into 2 transport bags. It is supplied with complete assembly instructions on paper & DVD.

With practice, the Voyager can be assembled in 10 minutes.

Accessories

Foam mattress – ideal when the Voyager is staying in the same location e.g. when used for respite.

Additional water-fillable ballast bags

"We have just returned from holiday in Florida & used the Voyager for the first time. To be able to place our son in a safe & secure environment, & to know that he is both happy (he loved it!) & safe, made the holiday stress-free & highly enjoyable. Such a simple yet life-changing piece of equipment."

Michael Martin, Windsor

"I bought the Voyager Compact to take my 9 year old daughter away on holiday. It was surprisingly quick, easy and uncomplicated to put together. It doesn't require any particular tools or physical strength. The instructions are very easy to understand. My 12 year old and I put it up for the first time in about 20 mins. I can sleep easy knowing that she is safe and contained overnight. I'm really delighted with my purchase".

Frances Scott, Galashiels Scottish Borders

Safespace Voyager® Compact

Where a full height Voyager is not required, we now offer the Voyager Compact. Using the same, strong materials, the Voyager Compact is a version of our popular travel product with lower walls, resulting in a lighter, smaller package for even easier transportation. It's lower height makes it stable enough for most adults as well as more boisterous children.

Visit our website www.safespaces.co.uk or call 01706 816274 for more information on the Safespace Voyager® Compact.

Accessories

Safespaces Mattress

Safespaces mattresses are covered in strong PVC & are extremely durable. They can be wiped clean & are soil, stain & odour resistant. They can be made rectangular or custom-made for a Safespace.

Memory Foam Mattress

A top layer of memory foam moulds to the body's contours for extra comfort. They are covered in soft & flexible fabric or where this is not suitable, our standard heavy duty PVC.

Removable Window Blinds

These can be used to cover viewing panels to create a low stimulation environment.

Floor Mats and Padded Wall Panels

Safespaces can supply a range of floor mats & padded wall panels in custom-made sizes & foam types to your specifications. Please let us know the sizes you require.

Safe Play and Soft Furniture

Our safe play shapes are made to order & can include slides, cubes, wedges & cylinders in a range of sizes. We also make soft foam furniture, including chairs & sofas. They are made of the same robust, quality materials as all of our equipment.

Projector Set

A projector set offers a range of colour & picture wheel options, instantly creating delightful effects & colourful, imaginary worlds in subdued lighting. The projector can be directed through the netting roof or a viewing panel of the Safespace or against a wall, where it can be enjoyed, while the equipment remains safely out of harm's way.

Solar 100 LED Projector

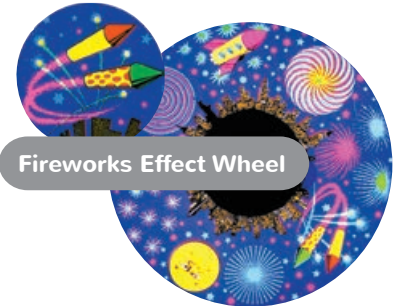

Solar 100 set contains;

- Solar 100 LED projector
- 1/2 RPM Wheelsafe rotator
- 1 liquid wheel
- 1 picture wheel

We now have an extensive choice of effects and picture wheels available. Contact us to discuss options.

Liquid Effect Wheel

Fireworks Effect Wheel

Fibre Optics Kit

Our Fibre Optics kit provides colour-changing light along the whole 200cm (79") length of their 100 strands creating a range of enchanting effects including a 'starry sky' when draped over the netting ceiling of the Safespace. The effect is both engaging & calming. The strands are safe to handle & suitable for use (under supervision) in the Safespace, Siesta & Cosyfit.

Each kit contains:

- Super bright LED light-source
- 100 strand x 200cm (78") sideglow strands (phthalate free)
- Colour wheel

Information

How much are they?

For up to date prices & quotes please phone or email our office: Phone: **01706 816274**
Email: **info@safespaces.co.uk**

We can provide a quote tailored to your specific needs. For the Safespace, this will include both a 2D and a 3D design of what it will look like in your home.

Measuring instructions & a room plan to provide us with the measurements we need to design a Safespace for you, can be found as downloads on our website: **www.safespaces.co.uk/downloads**. We can email, fax or post these to you if you prefer. Please call us if you have any queries.

VAT will be added if appropriate but you may be eligible for exemption. Please see our website for details: **www.safespaces.co.uk**

NB. A quote is usually required when applying for funding.

Where can I get the funding?

Most people who need Safespaces products have been able to obtain funding. We can offer information & support regarding the available options. We have a good relationship with a number of charities & can help with advice and information about these. Safespaces products have been bought as freestanding items of equipment & also as fixtures or as part of housing adaptations. They have been financed using a variety of statutory sources, for example, by hospital or community loan stores, the Disabled Facilities Grant (DFG) & some local authority funds e.g. equipment or adaptations budgets.

Please check our website or contact us for the latest information about funding sources.

Installation

The installation of Safespaces products that require specialist fitting will be carried out or supervised by our trained & experienced staff. Installation training will be provided where required. Please contact us for details & cost. Self assembly products will be delivered with assembly instructions.

Use & Care

Safespaces products are to be used in conjunction with appropriate levels of supervision. Use & Care guides are provided with each product. Please contact us if you would like any further information. Our fabrics are flame retardant. Full details are available on request.

"Safespaces cut out many sensory impressions that otherwise overwhelm and arouse our pupils. Being in a Safespace helps the child to relax, reduce their anxiety & promotes a feeling of safety."

For one of our pupils the Safespace is one of the few places he is actually safe at night. The Safespace means that he is unable to access any plugs, radiators or other objects that he might use inappropriately. This has meant that he now sleeps between 8 to 9 hours a night & no longer engages in risky daytime behaviour.

For some of our pupils who engage in self injurious behaviour the Safespace provides a truly safe space. The Safespace limits any sensory feedback as well as preventing any harm to the pupil so this quickly promotes a de-escalation, & keeps both the pupil & staff safe.

We have had our staff as well as members of my family sleep in Safespaces & all have enjoyed it saying that it provides a lovely cosy sleeping environment."

**Margaret Snellgrove,
Ochil Tower School, Perthshire**

Long term peace of mind

Our products have stood the test of time. You can hear what our customers have to say on the films on our website at **www.safespaces.co.uk/safespaces-films**. We provide long term value and peace of mind.
