GYRO

NOMAD POWER ASSIST KIT

No more U-turns, Take on the obstacles...

Thanks to our automatic double-wheel gyroscopic stabilisation,

getting onto a pavement or over an edge, riding on a lawn or gravel is no longer a problem. The tyres also absorb the shock for greater riding comfort on uneven terrain.

... in absolute safety.

The gyroscopic stabilisation mode is patented and has undergone stringent safety tests.

The NOMAD kit is also
**CERAH certified and
Social Security approved.**

Ride further

With its high-performance **active propulsion mode** and impressive battery life, the NOMAD kit combines sharp handling with riding pleasure in all indoor and outdoor conditions.

Obstacle
Clearance

6 cm

Optimum comfort for daily use

The NOMAD kit is light (**6kg** per wheel) and easy to assemble thanks to its axel-mounted pushbutton system. It is compact, easily transportable and designed to fit practically every wheelchair on the market, respecting the specifications of each one.

Battery life

16 KM

Speed

8 KM/H
