

SOLO

The lightweight add-on drive for your wheelchair

Enjoy long drives and live actively with your family – SOLO makes you mobile and flexible. This device does not only enrich your everyday life but it also increases your quality of life.

The SOLO's very easy converting concept transforms your manual wheelchair into a light and versatile electrical wheelchair in no time at all.

Two high-capacity motors integrated discreetly into the wheels provide the SOLO's power.

Since the SOLO can be adapted to almost all wheelchairs, you don't have to do without your familiar wheelchair adjusted to you personally.

Easy operation and high versatility make the SOLO an excellent partner for you every day.

Advantages that convince

- **Battery range up to 35 km**
- **NUI - New mounting and locking system of the powered wheels**
- **Powered wheels without stud axles**

SOLO

ALPHA concept
synergy of power and effortlessness

The ALPHA concept is the new measure of all things concerning state-of-the-art engines in connection with the newly developed battery pack with lithium ion technology. This concept is the reason why the SERVO reaches a range up to 55 km while the battery merely weighs 4.2 kg.

You operate **SOLO** with a control unit whose driving and steering qualities can be programmed according to your individual needs or wishes.

SOLO

SOLO⁺

The powerful add-on drive

To supply a light and flexible electrical wheelchair to bariatric persons is a difficult task. For many people mobility recede into the distance. Therefore, we developed the SOLO⁺ to offer a solution taking this into account.

The SOLO⁺'s easy modification concept transforms your manual wheelchair into a light and versatile electrical wheelchair in no time at all. The powerful drive of the SOLO⁺ with its high-capacity motors provides a high degree of mobility.

The ALPHA concept is the measure of all things, state of the art motors in connection with the newly developed battery pack with lithium ion technology.

The maximum total weight of the SOLO⁺, including the wheelchair and the person, is 250 kg.

Advantages that convince

- **Battery range up to 15 km**
- **Suitable for an approved maximum weight of 250 kg (person, wheelchair, SOLO⁺)**
- **Powered wheels without stud axles**
