

”Your cabinet comes down to help you reach in”

VERTIELECTRIC

YOUR KITCHEN CABINET WILL REACH NEW HEIGHTS

Electrical height adjustable system where the whole upper cabinet goes straight up and down and enables the user to reach items in the cabinets.

Ideal for very short people or wheelchair users in private homes, homes for elderly people, institutions and others.

The system is especially useful for wheelchair users as the tabletop becomes free space when the cabinet is raised up.

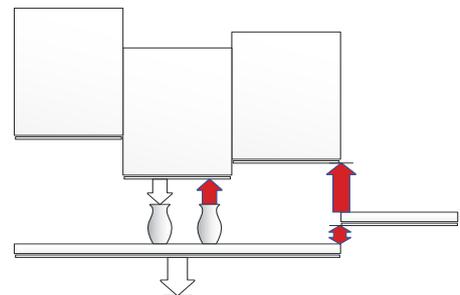

You can combine other upper cabinets with the VertiElectric system.

Smartbox for connecting the safety systems of several units - In principle, the collision protection devices of one or more Verti-Inside, VertiElectric, DiagonalElectric and FlexiElectric can be connected. Each system requires its own Smartbox.

Note...Smartbox cannot be combined with FlexiPlus.

Controlled by an integrated press pad in for example the kitchen fascia.

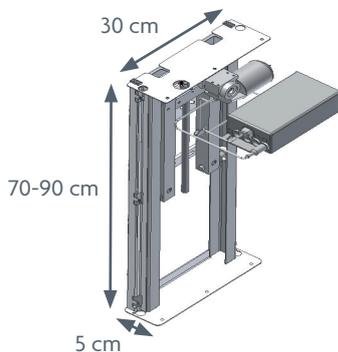

Smartbox installed to avoid trapping during upwards movement*

* Disclaimer; "only applies when table top or cabinet moves up into another smartbox-connected safety strip or safety stop plate".

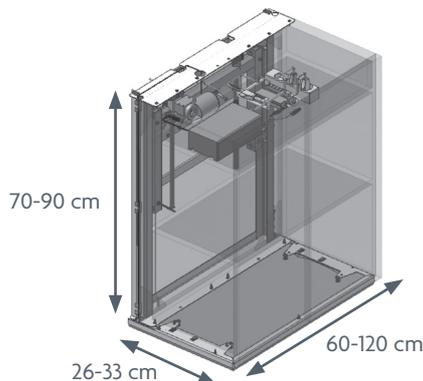

VERTIELECTRIC

Max. load: 80/120 kg
 Frame height: 70-92 cm
 Frame width: 40-180 cm
 Frame depth: 5 cm

Safety stop plate with LED spot
 Cabin width 130 to 180 cm
 3 spot Item: 30-42613
 4 spot Item: 30-42614 to 30-42618

TIPS:

- We recommend double kitchen doors for cabinets for widths from 60 cm. In that way the users don not need to move back to open the doors.
- Allow 3-5 mm of space on each side of the upper cabinets to make sure that the cabinets can run freely up and down.
- We always recommend safety stops for electrical frames.

NB! Find more information about measurements, technical data, installation interfaces and much more under the product and in the instruction manuals on our website.

The items are produced according to the following Standard: DS / ISO 17966:2016
