More than just a chair

“It’s the families we help along the way that make our work so fulfilling. Finding the right solution isn’t always easy, but the happy smiles are the reward for when we get it right.”

Dr Barend ter Haar (Founder)

BES Healthcare began as, and still is, a humble family-run business, driven by a passion to make a difference in the lives of those in need. Over the past three decades, we have grown into a trusted name in the industry, with our heart remaining rooted in providing care for the community.

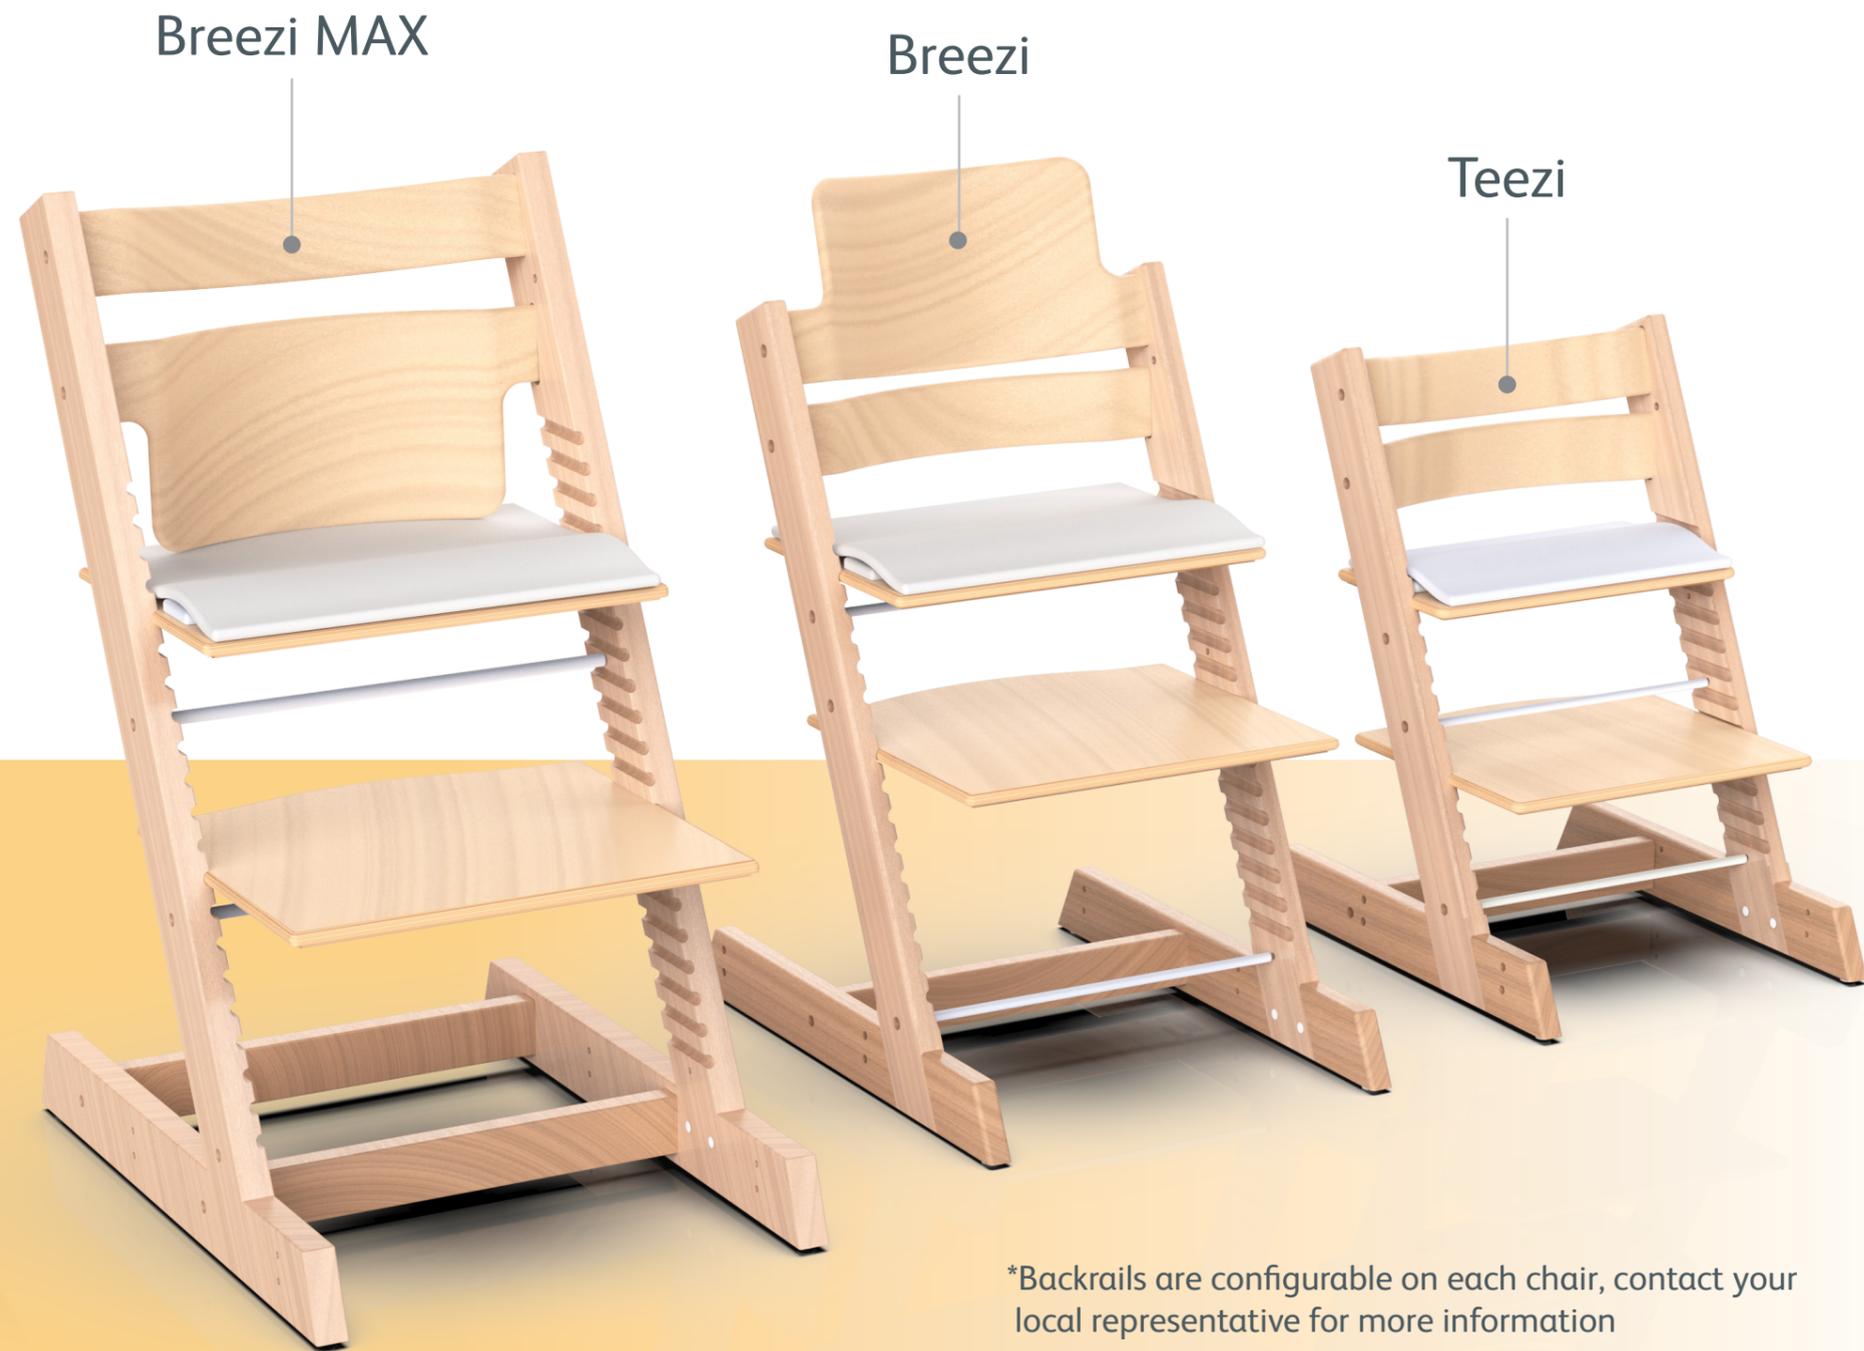

The ‘byBES’ Breezi Activity Chair embodies our commitment to quality and durability, proudly crafted in the United Kingdom. Designed with modularity at its core, the Breezi ensures that your child’s comfort and support evolve as they do, creating a lifelong companion that truly grows with them.

Here at BES, our compassionate team understands the unique challenges that come with providing assistive technology solutions. Through our years of knowledge and expertise, we aim to find you the right solution that makes a difference.

The Breezi Activity Chair is more than just a piece of furniture, it’s a dynamic solution that adapts to the changing needs of your child. Get in touch for an assessment with your local assistive technology specialist today.
